Digital Humanities and the Cyberspace Decade, 1990-2001 Claire Warwick,2024-10-03 Setting out a history of cyberspace and its relationship with the discipline that was to become digital humanities this book is an account of an often forgotten period of internet history in the 1990s when this medium was in its infancy It provides a detailed account of the concepts of cyberspace and the virtual which were characteristic of a perception that using the internet allowed users to enter a separate space from everyday life a world elsewhere In doing so it argues that this libertarian idea of the internet framed it as a new frontier where the rules of the everyday world did not and should not apply and where the individual could find freedom These early norms and the regrettable lack of regulation that was a consequence of them this book argues contributed to many of current issues with internet media including of toxic communication disinformation and over commercialisation

Plagues, Apocalypses and Bug-Eyed Monsters Heather Urbanski,2015-01-24 Speculative fiction both science fiction and fantasy reflects among other things the fears of the culture that created it contributing perhaps unconsciously to our efforts to prevent our fears from coming true While the names and media change over time the themes of speculative fiction have a long history Nineteenth century works such as Frankenstein and The Invisible Man contain many of the same messages as the more modern tales of Terminator Jurassic Park and even Buffy the Vampire Slayer although almost a century separates their creation This critical study discusses the ways in which speculative fiction reflects societal fears and analyzes how such cautionary tales contribute to society's efforts to avoid the realization of these fears Beginning with a discussion of the nature of speculative fiction it takes a look at the characteristics of the cautionary tale The core of the book however is the concept of the Nightmares Model which examines and categorizes the repetition of specific themes within the

genre The dangers of science and technology the perils of power and the threat of the unknown are discussed as recurrent themes within a variety of works in prose film and television Works analyzed range from *Twenty Thousand Leagues Under the Sea* to *2001 A Space Odyssey* to *The Blair Witch Project* Sources include the author's own observations as a member of the genre's fandom a variety of published commentaries and the perspectives of contemporary professionals gained through personal interviews and panel discussions

Frontiers of Cyberspace, 2012-01-01 The content of this volume reflects theoretical and practical discussions on cultural issues influenced by increased adoption of information and communication technologies The penetration of new forms of communication such as online social networking internet video casting and massive online multiplayer gaming the experience and exploration of virtual worlds and the massive adoption of ever emergent ICT technologies are all developments in desperate need of serious examination It is not surprising that these new realities and the questions and issues to which they give rise have drawn increasing attention from academics Those engaging these issues do so from a wide range of academic fields Accordingly the authors contributing to this volume represent an impressive array of academic disciplines and varied perspectives including philosophy sociology religion anthropology digital humanities literature studies film science new media studies and still others Thus the subsequent chapters offer the reader a multidimensional examination of this volume's unifying theme the ways and extent to which current and anticipated cybernetic environments have altered and will continue to shape our understandings of what it means to be human

Navigating Cybercultures Nicholas van Orden, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 This ebook provides an overview of the research presented at the seventh annual Visions of Humanity in Cyberculture Cyberspace and Science Fiction conference hosted by Inter Disciplinary Net at Mansfield College Oxford in July 2012 Ranging from analyses of virtual spaces and cyberpunk fiction to critical examinations of posthumanism and online behaviour with numerous fascinating detours along the way these interdisciplinary and international perspectives provide further evidence if any was needed that our lives are intricately networked and connected across digital fictional intellectual and posthuman spaces In one way or another the chapters collected here all attempt to navigate these spaces

Foucault and Law Ben Golder,2017-07-05 Few thinkers can have had a more diverse or a more contested

impact on theorizing law than Michel Foucault. This diversity is reflected in the wide range of Foucault's work and of the intellectual fields it has so conspicuously influenced. Such diversity informs the present collection and is signalled in the headings of its four sections: Epistemologies, archaeology, discourse, Orientalism, Political philosophy, discipline, governmentality and the genealogy of law, Embodiment, difference, sexuality and the law, The subject of rights and ethics. Whilst the published work selected for this collection amply accommodates this diversity, it also draws together strands in Foucault's work that coalesce in seemingly conflicting theories of law. Yet the editors are also committed to showing how that very conflict goes to constitute for Foucault an integral and radical theory of law. This theory ranges not just beyond the restrained and diminished conceptions of law usually derived from Foucault but also beyond the characteristic concern in Jurisprudence and Legal Philosophy to constitute law in its difference and separation from other socio-political forms.
