He noticed a track bolt and asked me why so much of the bolt should protrude beyond the nut. I replied It is the size which is generally used. He said Why should we use a bolt of such a length that a part of it is useless. I replied Well when you come right down to it there is no reason. We walked along and he asked me how many track bolts there were to a mile of track and I told him. Thereupon he remarked Well in the Union Pacific and Southern Pacific we have about eighteen thousand miles of track and there must be some fifty million track bolts in our system. If you can cut an ounce off from every bolt you will save fifty million ounces of iron and that is something worth while. Change your bolt standard.
