Monte Cassino In The Middle Ages Parts 1 11:

Monte Cassino in the Middle Ages Herbert Bloch, 1986 The monastery of Monte Cassino founded by St Benedict in the sixth century was the cradle of Western monasticism It became one of the vital centers of culture and learning in Europe At the height of its influence in the eleventh and early twelfth centuries two of its abbots including Desiderius and one of its monks became popes and it controlled a vast network of dependencies churches monasteries villages and farms especially in central and southern Italy Herbert Bloch's study the product of forty years of research takes as its starting point the twelfth century bronze doors of the basilica of the abbey the most significant relic of the medieval structure The panels of these doors are inscribed with a list of more than 180 of the abbey's possessions Mr Bloch has supplemented this roster with lists found in papal and imperial privileges and other documents The heart of the book is a detailed investigation of the nearly 700 dependencies of Monte Cassino from the sixth to the twelfth century and beyond No comparable study of this or any other great medieval institution has ever before been undertaken Ironically it was the bombing of 1944 which destroyed the monastery that led to an unexpected revelation the discovery on the reverse side of some panels of the doors of magnificent engraved figures of patriarchs and apostles These proved to be remnants of the church portal ordered from Constantinople by Desiderius in the eleventh century which marked the beginning of the grandiose reconstruction of the abbey and its church the latter to become a model for many other churches In order to solve the riddle of the doors of Monte Cassino Bloch has investigated other bronze doors of Byzantine origin in Italy and the doors of the great Italian master Oderisius of Benevento as well as those of S Clemente a Casauria and of the cathedral of Benevento Also included is a study of the political and cultural impact of Byzantium on Monte Cassino and a chapter on Constantinus Africanus Saracen turned monk one of the most interesting figures in the history of medieval medicine The text is sumptuously illustrated with 193 plates most of the more than 300 illustrations have never before been published This three volume work with its nine detailed indexes offers a wealth of information for scholars in many different fields *Monte Cassino in the Middle Ages, vol. II, pts. III-IV* ,

Crusading and the Crusader States Andrew Jotischky, 2017-02-17 Crusading and the Crusader States follows the progress of the major crusading expeditions offers insights into their continuing failure and charts the development of new attitudes towards Islam and its followers This new edition takes into account the wealth of rich and varied recent research to demonstrate that crusading should be seen as central to the European experience in the Middle Ages and engages in the key historiographical debates of the past decade This includes new research on how crusades were formed the political culture networks liturgies and crusading culture in the East It is essential reading for all students of the Crusades and medieval history *The Scriptorium and Library at Monte Cassino, 1058-1105* Francis Newton, 1999-04-29 In all the history of hand written books one of the most distinctive and handsome scripts is that of the abbey of Monte Cassino This study examines for the first time in detail the development of this script during the Abbey's greatest period of wealth

and influence under Desiderius abbot 1058 1087 and his successor Oderisius abbot 1087 1105 The characteristic Cassinese hand was established long before but in this period it was transformed into what is today considered its classic form The present study rests on a fresh examination of many details of the Beneventan South Italian script in aspects incompletely studied before It aims to provide a new history of Monte Cassino as a writing centre and to offer a context for many unique or valuable texts manuscripts that it processed *Part the first. Reynolds,2024-10-28 The theology of sacred or clerical orders of the Latin Church in the high and later Middle Ages developed from an amalgam of texts written from late patristic antiquity through to the early 12th century Such texts many studied and edited here include letters tracts sermons liturgical commentaries ordination instructions and canon law pieces Within these texts multiple topics might be considered such as the Old and New Testament origins of each of the clerical grades their number and hierarchical ranking the duties dress and moral conduct of a cleric and ordination ritual Particularly striking are the multiple duties assigned each grade and their modification in various parts of the Western Church Many of these texts found their way not only into more formal theological treatments of sacred orders but also into ordination rites Probably the most public and visible duty of a cleric was his function as a eucharistic officer and one essay in this collection deals with perhaps the most famous early medieval depiction of this clerical ritual on the ivory covers of the 9th century Drogo Sacramentary **A History of the Christian Church. Hoenen, 2013-02-06 This collection of essays delineates the history of the rather disparate intellectual tradition usually labeled as Platonic or Neoplatonic In chronological order the book covers the most eminent philosophic schools of thought within that tradition The most important terms of the Platonic tradition are studied together with a discussion of their semantic implications the philosophical and theological claims associated with the terms the sources that furnish the terms and the intellectual traditions aligned with or opposed to them The contributors thereby provide a vivid intellectual map of the Middle Ages and the Early Modern period Contributions are written in English or German *Part the first. Loud, 2024-10-28 This second volume by Graham Loud focuses on two key centres of the south Italian church in the central Middle Ages The first section concentrates on the golden age of the abbey of Montecassino during the 11th and 12th centuries when it was at the height of its influence and three of its monks became popes The studies seek to place the abbey in its context examining its relations with the papacy Byzantium and the local nobility The second part deals with Benevento and the abbey of St Sophia and looks at its development and administration as well as the tensions that arose from its position as a papal enclave within the Kingdom of Sicily Based on extensive archival research the volume as a whole presents a fresh and original insight into the society of southern Italy from the coming of the Normans to its conquest by Charles of Anjou Memoirs of Libraries: Part the first.
