Christian Ethics and Contemporary Moral Problems Michael C. Banner, 1999-09-28 This book addresses such key ethical issues as euthanasia the environment biotechnology abortion the family sexual ethics and the distribution of health care resources Michael Banner argues that the task of Christian ethics is to understand the world and humankind in the light of the credal affirmations of the Christian faith and to explicate this understanding in its significance for human action through a critical engagement with the concerns claims and problems of other ethics He illustrates both the distinctiveness of Christian convictions in relation to the above issues and also the critical dialogue with practices based on other convictions which this sense of distinctiveness motivates but does not prevent The book's importance lies in its attempt to show the crucial difference which Christian belief makes to an understanding of these issues whilst at the same time demonstrating some of the weaknesses and confusions of certain popular approaches to them

TALES OF BLESSED LAND Akin Adewale, 2014 The book is a fiction it deals with Legal political economic and social ills plaguing most developing countries that are still grappling with various developmental challenges The book highlights and satirizes all these ills and challenges facing these countries and proffer solutions to some of them There are some developing countries especially in Africa where there is failure of leadership This fuels ethnic religious and social upheavals which lead to political instability and even wars In some of these countries there is corruption of monumental proportion which slows down economic development and this may eventually lead to other social problems such as poverty chaos anarchy etc The book

politely and humorously point out these problems and the way forward Corruption is a global problem but the book also propounds a theory that corruption in large scale by a political leadership in any country may lead to economic problem that could cause extermination of the poor masses gradually through hunger preventable and curable diseases and that such corruption should be treated as massocide and as crime against humanity by the UNO The book also highlights the problem of unsuitability of some political arrangement of some developing countries that is also responsible for the political social and economic problems plaguing them and the need to have national dialogue to arrive at the best political arrangement which is indeed the foundation to build on The outcome of such national dialogue should be implemented and use to draft a new constitution The book humorously highlights the flight of integrity from some of these developing countries due to the bad example from leadership When corruption is the order of the day and there is impunity in that no one is punished even when caught it makes many people to join the bandwagon and hell is then let loose on the society Some lawyers when well paid by corrupt officials they would do all within their powers and explore legal loopholes and processes to either ensure that such cases drag to eternity in law courts or are never heard Due to the legal procedure that presume an accused person innocent until convicted in law courts the corrupt official going through trial in court would be free to pursue his her political ambition get elected into any political office and acquire more money to frustrate his her trial in law court This book highlights the foregoing too The book highlights the social ills plaguing many developing countries which reduce most human beings to subsistence level and in such situation higher human ideals are sacrificed on altar of expediency to survive Even the zeal to work hard and excel wane in many people as the economic climate favours those with political powers and their cohorts in such a situation everyone struggles to get to political power through any means It becomes a do or die affair The book will appeal to the public at large especially those who are interested in finding solutions to the problems affecting the developing countries
