**Objectivity, Realism, and Proof** Francesca Boccuni, Andrea Sereni, 2016-07-05 This volume covers a wide range of topics in the most recent debates in the philosophy of mathematics and is dedicated to how semantic epistemological ontological and logical issues interact in the attempt to give a satisfactory picture of mathematical knowledge The essays collected here explore the semantic and epistemic problems raised by different kinds of mathematical objects by their characterization in terms of axiomatic theories and by the objectivity of both pure and applied mathematics They investigate controversial aspects of contemporary theories such as neo logicist abstractionism structuralism or multiversism about sets by discussing different conceptions of mathematical realism and rival relativistic views on the mathematical universe They consider fundamental philosophical notions such as set cardinal number truth ground finiteness and infinity examining how their informal conceptions can best be captured in formal theories The philosophy of mathematics is an extremely lively field of inquiry with extensive reaches in disciplines such as logic and philosophy of logic semantics ontology epistemology cognitive sciences as well as history and philosophy of mathematics and science By bringing together well known scholars and younger researchers the essays in this collection prompted by the meetings of the Italian Network for the Philosophy of Mathematics FilMat show how much valuable research is currently being pursued in this area and how many roads ahead are still open for promising solutions to long standing philosophical concerns Promoted by the Italian Network for the Philosophy of Mathematics FilMat

**Architectural Notices of the Churches of the Archdeaconry of Northampton** John Henry Parker, 1849 *Architectural notices of the churches of the archdeaconry of Northampton. Deaneries of Higham Ferrers and Haddon* Northamptonshire architectural and archaeological society, Northampton archdeaconry, 1849

**Catalogue of a Collection of Engraved Portraits, the Largest Ever Submitted to the Public**, 1840 , **Report of the architectural society of the archideacoury of Northampton**, 1847 Statistics in the Law of Evidence Nicholas Lennings, 2024-11-14 This book evaluates the role played by statistical evidence in litigation Despite the increasing prevalence of statistical evidence in modern litigation how such evidence should be admitted and used by courts is often inconsistent and widely criticised Accepting that statistical evidence can lead to more accurate decisions the book proposes criteria that could allow courts to decide that statistical evidence is good for fact finding The many and varied scholarly debates regarding statistical evidence have by and large avoided judicial attention Unlike previous works this book contextualises those debates in the language and practice of evidence law focusing principally on Australia as well as the UK and the USA It does so by identifying that the controversy around statistical evidence follows the three tiered statistical syllogism underlying statistical inference first whether statistical evidence is capable of establishing an association between phenomena in a state of nature second inferring that phenomena to an individual from the general association and third whether statistical evidence can be sufficient for proof of contested facts Objections are said to arise at each level of this

sylllogism and by mapping these objections onto evidence law the book argues that a pathway for the judicial evaluation of statistical evidence can be constructed

**Advances in Computer Science - ASIAN 2006. Secure Software and Related Issues** Mitsu Okada, Ichiro Satoh, 2008-01-25 Running to more than 360 pages and complete with online files and updates this book constitutes the thoroughly refereed post proceedings of the 11th Asian Computing Science Conference ASIAN 2006 held in Tokyo Japan The 17 revised full papers and 8 revised short papers presented together with 1 invited paper were carefully selected during two rounds of reviewing from 115 submissions The papers cover theory practice applications and experiences related to secure software

**Criminal Evidence and Human Rights** Paul Roberts, Jill Hunter, 2012-05-18 Criminal procedure in the common law world is being recast in the image of human rights The cumulative impact of human rights laws both international and domestic presages a revolution in common law procedural traditions Comprising 16 essays plus the editors thematic introduction this volume explores various aspects of the human rights revolution in criminal evidence and procedure in Australia Canada England and Wales Hong Kong Malaysia New Zealand Northern Ireland the Republic of Ireland Singapore Scotland South Africa and the USA The contributors provide expert evaluations of their own domestic law and practice with frequent reference to comparative experiences in other jurisdictions Some essays focus on specific topics such as evidence obtained by torture the presumption of innocence hearsay the privilege against self incrimination and rape shield laws Others seek to draw more general lessons about the context of law reform the epistemic demands of the right to a fair trial the domestic impact of supra national legal standards especially the ECHR and the scope for reimagining common law procedures through the medium of human rights This edited collection showcases the latest theoretically informed methodologically astute and doctrinally rigorous scholarship in criminal procedure and evidence human rights and comparative law and will be a major addition to the literature in all of these fields

**Improperly Obtained Evidence in Anglo-American and Continental Law** Dimitrios Giannouloupoulos, 2019-02-21 This is the first book to offer an extensive cosmopolitan cross cultural insight into the perennial controversy over the use of improperly obtained evidence in criminal trials It challenges the conventional view that exclusionary rules are idiosyncratic of Anglo American law and highlights the constitutionalisation and internationalisation of criminal evidence and procedure as a cause of rapprochement or divergence beyond the Anglo American and Continental law divide Analysis focuses on confessional evidence and evidence obtained by search and seizure telephone interceptions and other means of electronic surveillance The laws of England and Wales France Greece and the United States are systematically compared and contrasted throughout this study but where appropriate analysis extends to other Anglo American and Continental legal systems The book reviews exclusionary rules vis vis the operation of judicial discretion and explores the normative justifications that underpin them It attempts to reinvigorate the idea of excluding evidence to protect constitutional or human rights the rights thesis arguing that there is significant scope for Anglo American and Continental legal systems to place a

renewed emphasis on it particularly in relation to confessional evidence obtained in violation of custodial interrogation rights we can locate an emerging rapprochement and unique potential for European Court of Human Rights jurisprudence to build consensus in this respect In marked contrast remaining divergence with regard to evidence obtained by privacy violations means there is little momentum to adopt a reinvigorated rights thesis more widely Longlisted for the Inner Temple Book Prize 2022 *Dairy-herd-improvement-association Letter*, 1956 *Catalogue of a Collection of Engraved Portraits, the Largest Ever Submitted to the Public* Edward Evans, 1836 **Essays in Law and History for David Ibbetson** Joe

Sampson, Stelios Tofaris, 2024-12-12 Over the last 40 years David Ibbetson has paved the way in a remarkably broad range of fields In ancient law his scholarship has spanned both the detailed doctrine of the Roman law of obligations and the cross pollination of legal influences around the ancient Mediterranean His work on English legal history has ranged from the earliest days of the common law through to the turn of the 20th century combining forensic archival research with a sensitivity to how lawyers thought about their subject In European legal history he has shown the porousness of the civil law and the extent to which it has been shaped by other areas of intellectual life from theology to rationalist philosophy The contributions to this volume in his honour mirror both the breadth and the depth of Ibbetson s scholarship The book combines chapters from leading legal historians close colleagues and over a dozen of Ibbetson s students Some chapters build upon or respond to Ibbetson s ideas others his areas of interest The contributions are introduced by Ibbetson s valedictory lecture on the importance of legal history to modern practice and scholarship and the work yet to be done

International Investment Law and the Law of Armed Conflict Katia Fach Gómez, Anastasios Gourgourinis, Catharine Titi, 2019-08-05 Assessing the extent to which armed conflict impacts the obligations that states have towards foreign investors and their investments under international investment treaties requires considering a wide range of issues many of which are systemic in nature These include substantive and procedural topics not only with regard to international investment law but also concerning the law on the use of force international humanitarian law and human rights law the law of treaties the law of state responsibility and the law of state succession This volume provides an in depth assessment of the overlap between international investment law and the law of armed conflict by charting the terrain of the multifaceted and complex relationship between these two fields of public international law fostering debate and offering novel perspectives on the matter **The Tapestry of Reason** Amalia Amaya, 2015-04-30 In recent years coherence theories of law and adjudication have been extremely influential in legal scholarship These theories significantly advance the case for coherentism in law Nonetheless there remain a number of problems in the coherence theory in law This ambitious new work makes the first concerted attempt to develop a coherence based theory of legal reasoning and in so doing addresses or at least mitigates these problems The book is organized in three parts The first part provides a critical analysis of the main coherentist approaches to both normative and factual reasoning in law The second part investigates the coherence theory in

a number of fields that are relevant to law coherence theories of epistemic justification coherentist approaches to belief revision and theory choice in science coherence theories of practical and moral reasoning and coherence based approaches to discourse interpretation Taking this interdisciplinary analysis as a starting point the third part develops a coherence based model of legal reasoning While this model builds upon the standard theory of legal reasoning it also leads to rethinking some of the basic assumptions that characterize this theory and suggests some lines along which it may be further developed Thus ultimately the book not only improves upon the current state of coherence theory in law but also contributes to the larger debate about how to articulate a theory of legal reasoning that results in better decision making *Samuel William*

*Philosophy of Mathematics* James Robert Brown,2005-08-09 Philosophy of Mathematics is an excellent introductory text This student friendly book discusses the great philosophers and the importance of mathematics to their thought It includes the following topics the mathematical image platonism picture proofs applied mathematics Hilbert and Godel knots and nations definitions picture proofs and Wittgenstein computation proof and conjecture The book is ideal for courses on philosophy of mathematics and logic *Modern Criminal Law* A P Simester,2024-04-18 This book brings together leading scholars from the next generation of UK criminal lawyers to celebrate the work of GR Sullivan Emeritus Professor at University College London in the year of his retirement from writing Simester and Sullivan s Criminal Law Theory and Doctrine The

contributors examine many of the areas in which GR Bob Sullivan's own writing has been influential ranging from general doctrines such as causation and culpability across specific offences like theft and fraud through defences including necessity and insanity before turning finally to matters affecting the criminal process notably challenges to the doctrine of precedent in criminal law Taken together the essays are a powerful tribute to Bob's standing and influence upon modern criminal law At the same time individually they make sophisticated contributions to our understanding of some pressing issues in contemporary criminal law The essays illustrate the increasing importance of theoretical argument in modern criminal law as well as the manner in which doctrinal debates have become interwoven with arguments about criminalisation norms The resulting collection is thus a tribute also to the character of modern academic criminal law a character that Bob and the writers of his generation did so much to develop
