Brewka, S. Coradeschi, A. Perini, 2006-08-10 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS Information Science and Applications Kuinam J. Kim, Hye-Young Kim, 2019-12-18 This book presents selected papers from the 10th International Conference on Information Science and Applications ICISA 2019 held on December 16 18 2019 in Seoul Korea and provides a snapshot of the latest issues regarding technical convergence and convergences of security technologies It explores how information science is at the core of most current research as well as industrial and commercial activities The respective chapters cover a broad range of topics including ubiquitous computing networks and information systems multimedia and visualization middleware and operating systems security and privacy data mining and artificial intelligence software engineering and web technology as well as applications and problems related to technology convergence which are reviewed

Varshney,Moonis Ali,2011-06-27 The two volume set LNAI 6703 and LNAI 6704 constitutes the thoroughly refereed conference proceedings of the 24th International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2011 held in Syracuse NY USA in June July 2011 The total of 92 papers selected for the proceedings were carefully reviewed and selected from 206 submissions The papers cover a wide number of topics including feature extraction discretization clustering classification diagnosis data refinement neural networks genetic algorithms learning classifier systems Bayesian and probabilistic methods image processing robotics navigation optimization scheduling routing game theory and agents cognition emotion and beliefs **Concrete Solutions 2011** Michael Grantham,Viktor Mechtcherine,Ulrich Schneck,2011-09-08 The Concrete Solutions series of International Conferences on Concrete Repair began in 2003 with a conference held in St Malo France in association with INSA Rennes followed by the second conference in 2006 with INSA again at St Malo France and the third conference in 2009 in Padova and Venice in association with the University of Padova Now in 2011 the event is being held in Dresden in Germany and has brought together some 112 papers from 33 countries

Whereas electrochemical repair tended to dominate the papers in earlier years new developments in structural strengthening with composites have been an increasingly important topic with a quarter of the papers now focusing on this area New techniques involving Near Surface Mounted NSM carbon fibre rods strain hardening composites and new techniques involving the well established carbon fibre and polyimide wrapping and strengthening systems are presented Seventeen papers concentrate on case studies which are all important in such conferences to learn about what works and what doesn't work on real structures Thirteen papers are devoted to new developments in Non Destructive Testing NDT Other topics include service life modelling fire damage surface protection methods and coatings patch repair general repair techniques and whole life costing This book is essential reading for anyone engaged in the concrete repair field from engineers to academics and students and also to clients who as the end user are ultimately responsible for funding these projects and making those difficult decisions about which system or method to use

Understanding Analog Side Channels Using Cryptography Algorithms Alenka Zajić, Milos Prvulovic, 2023-09-30 This book offers the latest research results on analog side channels and their usage in cybersecurity It demystifies analog side channels and demonstrates new use cases for them The first part of this book discusses how analog side channels are generated the physics behind it the modeling and measurements of analog side channels and their analogies to wireless communication systems The second part of this book introduces new applications that benefit from leveraging side channels In addition to breaking cryptography algorithms it demonstrates how analog side channels can be used for malware detection program profiling hardware profiling hardware software attestation hardware identification and hardware Trojan detection Side channel is one of the methods for obtaining information about program execution Traditionally they are used in computer science to extract information about a key in cryptographic algorithms What makes them different from other ways of extracting information about program execution is that side channels rely on how a system implements program execution rather than what the program s algorithm specifies Analog side channels are particularly powerful because they are not easy to suppress or detect that someone is collecting information from the system Although they are very powerful tools they are poorly understood This book targets advanced level students in computer science and electrical engineering as a textbook Researchers and professionals working with analog side channels how to model them measure them improve signal to noise ratio and invent new signal processing techniques can also use this book Computer scientists and engineers who want to learn new applications of side channels to improve system security new techniques for breaking cryptography keys new techniques for attestation and new techniques for hardware Trojan detection will also want to purchase this book
