Footprints of Fallen Giants - Pathways to Extinction in North American History Clay Sherrod, 2016-08-26 Footprints is about an evolution revolution the non living world to the living tiny organisms of earliest Earth each striving to have enough precious time to evolve so they might survive long enough to resist the effects of a changing world And yes it is a story about Dinosaurs But the story being about evolution has an unhappy ending for the great Dinosaurs of the Cretaceous For what is surely natural reasons as well as self imposed doom by the creatures themselves they fell fate to Extinction just had many plants and animals had almost 200 million years earlier This is not just the story of Dinosaurs and their extinction all of the biological world is subject to and ultimately succumbs to demise through the processes of environment and nature Today the possibilities of extinction are greatest because of the introduction of the newest form of life on Earth humans who have the capability of altering an otherwise natural progression of this world we live on

Pathways and Patterns in History Peter J. Morden, 2020-10-06

Professor David Bebbington is a highly regarded historian. He holds a chair at the University of Stirling, has been President of the Ecclesiastical History Society and has delivered numerous endowed lecture series as well as being deeply involved in the Dr Williams's Dissenting Academies Project. He is both a popular and influential academic historian whose writings have significantly shaped our thinking about the history of evangelicalism, Baptist life and political developments. In *Pathways and Patterns*, colleagues, former research students and friends who are indebted to Professor Bebbington and value his contribution to scholarship join together to pay tribute to his outstanding work. Not only has he stimulated academic endeavour, he has also given much personal support, not least to those in the Baptist Historical Society and in Colleges among them Spurgeon's College and Baylor University USA where he is a Distinguished Visiting Professor. This volume reflects his wide involvements and the grateful esteem in which he is held. Among Professor Bebbington's achievements has been both instituting and masterminding the very important International Conference on Baptist Studies (ICOBBS) held every three years in different parts of the world. It is appropriate then that this volume was presented to him at the Seventh ICOBBS Conference held in Manchester July 2015.

The Path to a Modern South Walter L. Buenger, 2010-06-28. The forces that turned Northeast Texas from a poverty-stricken region into a more economically prosperous area. Winner Texas State Historical Association Coral H. Tullis Memorial Award for best book on Texas history. 2001 Federal New Deal programs of the 1930s and World War II are often credited for transforming the South, including Texas, from a poverty-stricken region mired in Confederate mythology into a more modern and economically prosperous part of the United States. By contrast, this history of Northeast Texas, one of the most culturally southern areas of the state, offers persuasive evidence that political, economic and social modernization began long before the 1930s and prepared Texans to take advantage of the opportunities presented by the New Deal and World War II. Walter L. Buenger draws on extensive primary research to tell the story of change in Northeast Texas from 1887 to 1930. Moving beyond previous more narrowly focused studies of the South, he traces and interconnects the significant changes that occurred in politics, race relations, business and the economy and women's roles. He also reveals how altered memories of the past and the emergence of a stronger identification with Texas history affected all facets of life in Northeast Texas.

Pathways to Exploration

National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Division on Engineering and Physical Sciences, Space Studies Board, Aeronautics and Space Engineering Board, Committee on Human Spaceflight, 2014-09-30. The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions, from the early Mercury and Gemini suborbital and Earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades. Today the United States is the major partner in a massive orbital facility, the International Space Station, that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights. And yet the long-term future of human spaceflight beyond this project is unclear. Pronouncements by multiple presidents of bold new ventures by Americans to the Moon, to Mars, and to an asteroid in its native orbit have not been matched by the same commitment that accompanied President Kennedy's now-fabled 1961 speech, namely the substantial increase in NASA funding needed to make it happen. Are we still committed to advancing human spaceflight? What should a long-term goal be, and what does the United States need to do to achieve it? *Pathways to Exploration* explores the case for advancing this endeavor, drawing on the history of rationales for human spaceflight, examining the attitudes of stakeholders and the public, and carefully assessing the technical and fiscal realities. This report recommends maintaining the long-term focus on Mars as the horizon goal for human space exploration. With this goal in mind, the report considers funding levels necessary to maintain a robust tempo of execution, current research and exploration projects, and the time resources needed to continue them, and international cooperation that could contribute to the achievement of spaceflight to Mars. According to *Pathways to Exploration*, a successful U.S. program would require sustained national commitment and a budget that increases by more than the rate of inflation. In reviving a U.S. human exploration program capable of answering the

enduring questions about humanity's destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal Searching for the Bright Path James Taylor

Carson,2003-01-01 Blending an engaging narrative style with broader theoretical considerations James Taylor Carson offers the most complete history to date of the Mississippi Choctaws Tracing the Choctaws from their origins in the Mississippian cultures of late prehistory to the early nineteenth century Carson shows how the Choctaws struggled to adapt to life in a New World altered radically by contact while retaining their sense of identity and place Despite changes in subsistence practices and material culture the Choctaws made every effort to retain certain core cultural beliefs and sensibilities a strategy they conceived of as following the straight bright path This work also makes a significant theoretical contribution to ethnohistory as Carson confronts common problems in the historical analysis of Native peoples **Latin American Politics** David

Pathways to the Present Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam *Pathways to the Present* is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south *The Path to the American Revolution* Jonathan R.
