Pathways To Success Through Identity-based Motivation Daphna Oyserman, 2015-02-27 Everyone can imagine their future self even very young children and this future self is usually positive and education linked To make progress toward an aspired future or away from a feared future requires people to plan and take action Unfortunately most people

often start too late and commit minimal effort to ineffective strategies that lead their attention elsewhere As a result their high hopes and earnest resolutions often fall short In Pathways to Success Through Identity Based Motivation Daphna Oyserman focuses on situational constraints and affordances that trigger or impede taking action Focusing on when the future self matters and how to reduce the shortfall between the self that one aspires to become and the outcomes that one actually attains Oyserman introduces the reader to the core theoretical framework of identity based motivation IBM theory IBM theory is the prediction that people prefer to act in identity congruent ways but that the identity to behavior link is opaque for a number of reasons the future feels far away difficulty of working on goals is misinterpreted and strategies for attaining goals do not feel identity congruent Oyserman s book goes on to also include the stakes and how the importance of education comes into play as it improves the lives of the individual their family and their society The framework of IBM theory and how to achieve it is broken down into three parts how to translate identity based motivation into a practical intervention an outline of the intervention and empirical evidence that it works In addition the book also includes an implementation manual and fidelity measures for educators utilizing this book to intervene for the improvement of academic outcomes PISA Pathways to Success How Knowledge and Skills at Age 15 Shape Future Lives in Canada
