Pathways From Heroin Addiction Recovery Without Treatment Health Society And Policy:

Integrating Cultural, Observational, and Epidemiological Approaches in the Prevention of Drug Abuse and HIV/AIDS, 1999 *Drug Users in Society* Joanne Neale, 2001-11-28 This book provides a candid insight into the lives of

individuals who are addicted to heroin and other opiates The processes of obtaining and using drugs are explored within the wider context of personal biographies and daily routines Key issues considered include childhood experiences crime and violence housing situations family relationships prison life health matters and drug treatments Drug users statements are related to policy service provision previous research and theoretical debates in the hope that this might increase understanding and improve future responses to drug problems **Pathways from Heroin Addiction** Patrick

Biernacki, 1986 Examines the social and psychological processes that enabled 100 drug users to naturally recover from heroin addiction without professional help Drug Policy and Human Nature W.K. Bickel, R.J. DeGrandpre, 2013-11-11 The formation of drug policy is a complex phenomena influenced by a multitude of sources Among others these influences include historical factors contemporary public opinion regarding the nature and magnitude of drug use and abuse the portrayal of illicit drugs and drug use in the media and lobbying efforts by special interest groups e.g. The Drug Policy Foundation including government agencies e.g. the Justice Department and law enforcement An additional source of influence are the activities of specialists directly engaged in studying drug use and treating drug dependence This includes individuals involved in drug treatment anthropological and cultural studies policy analyses basic psychological and pharmacological research research on the epidemiology of drug use and dependence and research on prevention This influence by specialists might be usefully distinguished from those influences first mentioned for two reasons First studies of drug use and dependence attempt to uncover empirical generalizations about drugs and second because these findings are empirical there is a hope that they guide at least to some extent the actions of other forces that more directly determine drug policy Psychology as an empirical discipline has long been interested in the use of psychoactive drugs At the level of basic science in psychopharmacology a most important contribution has been the demonstration that drugs of abuse function as reinforcers and thus enter into the same psychological processes as do other appetitive stimuli National Library of Medicine Current Catalog National Library of Medicine (U.S.), *Global AIDS Policy* Douglas A. Feldman, 1994-10-30 An estimated 17 million people are infected with HIV today and it is estimated that in Africa alone there will be at least 70 million people infected in the next 25 years This global pandemic has already had a profound impact economically and socially in terms of expensive research care centers and immeasurable loss of many of the world's most talented people Sexual relations health care of non infected individuals family relations and other social institutions have been significantly marked by this elusive and to date life threatening phenomenon Topics range from breastfeeding to condom use from apathetic governments to immigration policy Dr Feldman and his contributors evaluate various policies that have been

proposed or adopted on four continents and provide a needed perspective on planetary problems

The Case for Legalizing Drugs Richard L. Miller, 1991 On the 75th anniversary of the Harrison Narcotic Act that unleashed the federal anti drug crusade historian Richard Lawrence Miller explores the origins purposes and effects of America s drug war Thoroughly documented The Case for Legalizing Drugs assembles diverse findings by chemists biologists pharmacologists psychologists sociologists anthropologists historians prosecutors police officers and drug users themselves The resulting mosaic argues that most problems associated with illicit drugs are caused by laws restricting them This book is a realistic appraisal of legalization vital to anyone concerned about illicit drugs public policy and democracy Despite the ineffectiveness and counterproductivity of anti drug laws enthusiasm grows for them Laws that fail to eliminate drugs may nonetheless achieve hidden goals Miller illuminates those goals and asks whether they are wise Although drug war proponents may complain that civil liberties interfere with drug suppression Miller argues that the answer is not less democracy but more He presents a message of hope and healing based upon a century of scientific research and historical experience and declares that legalization would not be a surrender to drugs but liberation from them

Current Catalog National Library of Medicine (U.S.), 1992 First multi year cumulation covers six years 1965 70

Introducing Qualitative Research In Psychology Willig, Carla, 2013-05-01 This vital student resource takes six different approaches to qualitative methods and discusses the techniques to use these in research

Bringing Criminological Theory to Life Emily Turner, Rose Broad, Caroline Miles, Shadd Maruna, 2025-08-14 Taking a unique approach to bring the theories of desistance and of development criminology to life the chapters in this book are framed around a single individual s life story which have inspired rigorous evidence based and scholarly chapters on key issues in criminology

On Addiction Darin Weinberg, 2024-08-23 Mainstream addiction science sees addiction either as a biomedical disease that renders one incapable of self control or as a voluntary practice engaged in freely In On Addiction Darin Weinberg shows how this dynamic is deeply influenced by a series of binaries free will determinism mind body objectivity subjectivity that hinder our understanding of addiction Here he offers a new theorization of addiction in which he breaks down these contradictions and incompatibilities calling into question the taken for granted distinction between the biological and the social To the extent that it is understood as a loss of self control over one s behavior addiction Weinberg

contents requires a supplementary theoretical framework that provides for movements into and out of self control for the social and natural processes that influence these movements for the historical contexts within which they occur and for the ethical ramifications of taking them seriously To create this framework Weinberg brings together history ethnography and critical theory as well as the clinical and social sciences In this way Weinberg takes a more holistic approach to examining the fundamental nature and ethics of addiction Book Review Digest ,1988 **Community Prevention of Alcohol**

Problems Marja Holmila,1997-08-18 This book is an action research study of a community at work The community prevention project set the system in motion revealing its character and internal dynamics This process and its context are analyzed from a sociological point of view It is shown that the type of community prevention that really works and creates sustainable changes is neither value neutral nor given from above it adheres to reason rituals and emotions alike and requires subjective involvement of the people in the community *Annual Meeting of the American Public Health Association and Related Organizations* American Public Health Association,1985 Medical and Health Care Books and Serials in Print ,1997 Drug Policy and the Public Good ,2010 Drug Policy and the Public Good is a book by an international group of addiction scientists to improve the links between addiction science and drug policy It presents the accumulated scientific knowledge on drug use research that has a direct relevance to the development of drug policy at local national and international levels **Changing Lives, Changing Drug Journeys** Lisa Williams,2013 This book describes how a group of young people make decisions about drug taking It charts the decision making process of recreational drug takers and non drug takers as they mature from adolescence into young adulthood With a focus upon their perceptions of different drugs it situates their decision making within the context of their everyday lives Changing lives changing drug journeys presents qualitative longitudinal data collected from interviewees at age 17 22 and 28 and tracks the onset of drug journeys their persistence change and desistance The drug journeys and the decision making process which underpins them are analysed by drawing upon contemporary discourses of risk and life course criminology In doing so a new theoretical framework is developed to help us understand drug taking decision making in contemporary society This framework highlights the pleasures and risks that interviewees perceive when making decisions whether or not to take drugs The ways in which their drug journeys and life journeys intersect and how social relationships and transitions to adulthood facilitate or constrain the decision making process are also explored Qualitative longitudinal research of this kind is uncommon yet it provides an invaluable insight into the decision making process of individuals during the life course The book will therefore be of interest to researchers and students from a variety of disciplines including qualitative research methods as well as sociology criminology cultural and health studies It will also be an important resource for professionals working in health promotion drugs education harm reduction and treatment Managing Addiction as a Chronic Condition: A Reprint from "Addiction Science and Clinical Practice" ,
