Allsen,2011-06-03 From antiquity to the nineteenth century the royal hunt was a vital component of the political cultures of the Middle East India Central Asia and China Besides marking elite status royal hunts functioned as inspection tours and imperial progresses a means of asserting kingly authority over the countryside The hunt was in fact the court out of doors an

open air theater for displays of majesty the entertainment of guests and the bestowal of favor on subjects In the conduct of interstate relations great hunts were used to train armies show the flag and send diplomatic signals Wars sometimes began as hunts and ended as celebratory chases Often understood as a kind of covert military training the royal hunt was subject to the same strict discipline as that applied in war and was also a source of innovation in military organization and tactics Just as human subjects were to recognize royal power so was the natural kingdom brought within the power structure by means of the royal hunt Hunting parks were centers of botanical exchange military depots early conservation reserves and important links in local ecologies The mastery of the king over nature served an important purpose in official renderings as a manifestation of his possession of heavenly good fortune he could tame the natural world and keep his kingdom safe from marauding threats human or animal The exchanges of hunting partners cheetahs elephants and even birds became diplomatic tools as well as serving to create an elite hunting culture that transcended political allegiances and ecological frontiers This sweeping comparative work ranges from ancient Egypt to India under the Raj With a magisterial command of contemporary sources literature material culture and archaeology Thomas T Allsen chronicles the vast range of traditions surrounding this fabled royal occupation
