looking after them would fall increasingly on one group daughters The government in promoting its move in social policy towards community care had stated that the family which in practice meant women must expect to provide the bulk of care in the future But how do women feel about this What impact does caring for others have on their own lives How might professional helpers better support them Originally published in 1988 from in depth interviews with daughters who have looked after their mothers for varying numbers of years Jane Lewis and Barbara Meredith look at why it is that women come to care and consider the legacy of their caring experiences Because caring is usually a labour of love the feelings that surround it are complicated and fraught with ambivalence In analysing these Daughters Who Care explores the meaning of caring from the carer s point of view as well as examining the implications for professionals seeking to support the supporters Carers themselves and those working with them professionally or as volunteers as well as students of community care social policies for the elderly and social psychology will all find this a stimulating approach to what is still an increasingly urgent issue

The Politics of Women's Interests Louise Chappell, Lisa Hill, 2006-09-27 This new study reveals how institutional practices and discourses shape the way men and women are conceived of and how through this process gender stereotypes and expectations are created Informed by the latest research and trends these expert authors examine the way in which domestic and global institutions shape and reflect gender interests and the extent to which feminists can challenge gender norms through political institutions They examine regional national and international institutions including the EU ICC and UN and take a broad view of political institutions to include bureaucracy federalism legal structures parliaments voting and electoral institutions and media coverage of women s involvement in such institutions Drawing on experiences in the US UK Australia Canada and New Zealand this book will be of great interest to students and scholars of gender studies political science and comparative politics

Why Women are Oppressed Anna G. Jónasdóttir, 1994 A feminist of international standing strives toward a theory about the web of relations between the sexes

Love, Power, and Knowledge Hilary Rose, 1994 Rose s passionately engaged book develops new terms for thinking about science and feminism She locates the feminist criticism of science as integral to both the feminist movement and the radical science movement She attend to the political economy of the production of knowledge and to what does and does not count as knowledge how women and minorities are affected by these processes is also explored Because biology is destiny is both an old and oppressive claim made by science she examines at length the latest and massively resourced claimant the Human Genome program the so called Holy Grail of the new industrialized genetics Rose s commitment to feminist resistance against the science and technology of oppression leads her to explore feminist science fiction as an ally of feminist science critics with its imaginative capacity to explore different futures with different sciences and technologies

Handbook of Studies on Men and Masculinities Michael S. Kimmel, Jeff Hearn, Raewyn Connell, 2005 In the past research in the field of gender has mainly addressed issues about women and has for the most part been developed by women Recently the study of

gender has rapidly expanded and there has been a growing interest in men's and boys' identities, conduct, and problems. The Handbook of Studies on Men and Masculinities is an interdisciplinary and international culmination of the growth of men's studies that also offers insight about future directions for the field. The Handbook provides a broad view of masculinities primarily across the social sciences with the inclusion of important debates in some areas of the humanities and natural sciences. The various approaches presented in this Handbook range across different disciplines, theoretical perspectives, methodologies, and conceptualizations in relation to the topic of men. Editors Michael S. Kimmel, Jeff Hearn, and Robert W. Connell have assembled an esteemed group of contributors who are among the best known experts in their particular fields. The Handbook of Studies on Men and Masculinities examines the construction of masculinities in four different frames: the social organization of masculinities in their global and regional iterations; the institutional reproduction and articulation of masculinities; the ways in which masculinities are organized and practiced within a context of gender relations; and the ways in which individual men express and understand their gendered identities. The Handbook is organized in a way that moves from the larger global and institutional articulations of masculinities to the more intimate and personal expressions. The Handbook of Studies on Men and Masculinities provides scholars, researchers, and students with the most current incisive scholarship available for the men's studies area of gender studies. It is a vital resource for those interested in the practical or cultural issues about men, boys, and gender, as well as an excellent addition to any academic library. **Feminist**

Perspectives on Family Care Nancy R. Hooyman, Judith Gonyea, 1995-08-29 Today women find themselves playing an ever increasing role in caring for older family members who are frail, developmentally disabled, or suffering from serious mental illness. While this role of women as caregivers has been documented, the actual impact on the lives of women has remained largely unstudied. In this volume, the authors examine caregiving as a central feminist issue, looking at its impact on women socially, personally, and economically. The authors review how changing family structures, the changing economy, and workforce, and the changing health care demands of needy adults have impacted on women's lives. They critique existing public and private policies, demonstrating a need for fundamental structural changes in social institutions and attitudes to improve the lives of women. Finally, they propose a social model of care that is oriented toward gender justice, recognition of the work of caring, and its impact upon women socially, personally, and economically. For students, scholars, and practitioners in the field of gerontology, gender studies, and social work, this book is a must. **Feminist Foundations** Kristen A.

Myers, Cynthia D. Anderson, Barbara J. Risman, 1998-03-10 There can be no doubt that feminism and its influence on the academy has wrought enormous changes on the social sciences in general and sociology in particular. This edited volume is an outgrowth of a discussion that began on the Sociologists for Women in Society Listserv in which participants were asked to talk about key pieces in feminist scholarship that had particularly influenced their sociological thinking. Editors Kristen A. Myers, Cynthia D. Anderson, and Barbara J. Risman have chosen articles that fall into what they consider the intellectual genres

that compose feminist sociology This collection differs from others because the editors avoid organizing material by substantive specialty areas i e family race and ethnicity criminology or methods Their vision instead sees sociology as an integrated discipline where feminist contributions have systematically influenced the shape of the whole by similarly influencing the distinct parts In addition to simply compiling a comprehensive list of important articles from the last two decades the editors have invited major feminist scholars to comment and reflect on the articles in each section of the book These reflections help provide the historical and social context in which feminist scholarship has taken place This book will be of obvious appeal to feminist scholars and gender sociologists Yet as feminist thought rightfully takes its place away from the margins and toward the center of the discipline this book stands as a rich and useful resource for any contemporary theory course

Women and Politics in the Third World Haleh Afshar, 2005-07-26 Women and Politics in the Third World is the first comprehensive textbook on women s political activities in the third world It provides a feminist analytical perspective on the specific forms of resistance organisation and negotiation by women in third world states Using case studies the book focuses on difference as a theoretical basis for investigating feminine political activism Though Western analysts have attributed weakness to terms such as motherhood marriage and domesticity as choices made by non Western women the contributors show that such strategies are used by women to pursue particular goals such as seeking resources welfare or freedom from oppression for their children These strategies the book suggests should not be classified as unimportant or temporary and can be highly effective even within such discourses as Islamic fundamentalism The contributors highlight differing political approaches in regions as diverse as Latin America South East Asia China and the Middle East

The Goals of Social Policy Martin I A Bulmer, Jane Lewis, David Piachaud, 2022-03-07 First published in 1989 The Goals of Social Policy is an invaluable text that will give students an admirable introduction to the central concerns of the study of social policy It asks what have been the traditional concerns of social policy as a subject of academic study and what its context should be in the changed political environment of twenty first century Three issues receive close attention for their future implications social policy and the family focusing on gender social policy and community including race and public order issues and social policy and the economy Retrospective chapters examine the relationship between social policy and social research social theory and social work The book will appeal particularly to students of social policy social work sociology and political science as well as to those in applied fields such as criminology health studies education and women s studies with interests in social policy It will also appeal to the general reader interested in keeping abreast of the latest thinking about social policy

Gender, Sexuality and Violence in Organizations Jeff Hearn, Wendy Parkin, 2001-07-05 This exceptionally interesting study provides an up to date and integrated perspective on organizations violence gender and sexuality It pays particular attention to the power wielded by hierarchies of heterosexual men and the ways in which this produces violence in different carefully analyzed forms This book is a major contribution to the construction of sociological

and political knowledge that is not founded on the dominant definitions of heterosexual masculinities Professor Terrell Carver University of Bristol This is a wide ranging and authoritative book The authors draw attention to the huge amount of evidence now available that documents the gendering and sexualising processes at the core of organisational life While they never nag about violation and inequality they are nonetheless relentless in confronting the reader with the weight of evidence Professor Rosemary Pringle University of Southampton This book brings together the themes of gender sexuality violence and organizations The authors synthesize the literature and research which has been done in these fields and provide a coherent framework for understanding the interrelationship between these concepts The importance of violence and abuse and particularly men s violence to women children and other men has been well established especially through feminist and some pro feminist research The insights of this scholarship have rarely been applied to organizational analysis The authors draw on this literature and their own research as well as relevant literatures on safety and risk at work anxiety and stress at work organizational policies on violence sexual harassment and bullying in organizations and male sexuality to provide valuable information on violence in and around organizations Gender Sexuality and Violence in Organizations breaks new ground in organization studies and will be essential reading for academics and students in both organization studies and all those studying issues of gender and sexuality in organizations

Fortunes of Feminism Nancy Fraser,2020-03-31

Nancy Fraser s powerful new book documents the movements of feminism and the shifts in the feminist imaginary since the 1970s Fraser follows the history of feminism from the ferment of the New Left during which Second Wave feminism emerged as a struggle for women s liberation alongside other social movements to its emersion in identity politics following the decline of its initial utopian energies Alongside this detailed history Fraser recognizes the need for a reinvigorated feminist radicalism to respond to the crisis in neoliberalism She argues for a feminism that could join other egalitarian movements in struggles aimed at subjecting capitalism to democratic control while retrieving the core utopian insights of feminism s earlier phases

Men In The Public Eye Jeff Hearn,2006-05-11 Men in the Public Eye reveals why men s domination in and of the public sphere is a vital feature of gender relations in patriarchy It also shows how public domains dominate private domains contributing to the intensification of public patriarchies Jeff Hearn explores these important issues by focusing on the period 1870 1920 when there was massive growth and transformation in the power of the public domains He demonstrates that these historical debates and dilemmas are still relevant today as men search for new postmodern forms of masculinities

Theorising Modernity Martin O'Brien,Sue Penna,Colin Hay,2014-07-10 What is modernity Do we all experience modernity in the same way How should we understand contemporary social change This volume explores questions of modernity through critical engagements with the work of Anthony Giddens focusing in particular on the relationships between his social theory and political sociology Three substantive areas reflexivity environment and identity are examined theoretically through the relationships between reflexivity and rationality life politics and institutional power and

universalism and difference As well as specifically addressing Giddens reconstruction of sociology the contributors also explore a wide variety of critical issues currently occupying centre stage in social theory These include questions about the character of contemporary societies the periodisation of social change the processes of change by which societies are constantly made and remade by people the relationships between the social and the natural the formation and maintenance of identities and matters of epistemology and methodology in social science Theorising Modernity will be of interest to undergraduate and postgraduate students of sociology modern political thought social geography and social policy and to social scientists trying to make sense of the modernity debate Martin O'Brien is Research at the University of Derby Sue Penna is a Lecturer in Applied Social Science at Lancaster University Colin Hay is a Lecturer in the Department of Political Science and International Studies at the University of Birmingham UK a Visiting Fellow of the Department of Political Science at the Massachusetts Institute of Technology US and Research Affiliate of the Centre for European Studies at Harvard University US
