The Routledge Handbook of the History of Race and the American Military Geoffrey Jensen, 2016-04-20. The Routledge Handbook of the History of Race and the American Military provides an important overview of the main themes surrounding race in the American military establishment from the French and Indian War to the present day. By broadly incorporating the latest research on race and ethnicity into the field of military history, the book explores the major advances that have taken place in the past few decades at the intersection of these two fields. The discussion goes beyond the study of battles and generals to look at the other peoples who were involved in American military campaigns and analyzes how African Americans, Native Americans, Asian Americans, and Chicanos helped shape the course of American history both at home and on the battlefield. The book also includes coverage of American imperial ambitions and the national response to encountering other peoples in their own countries. The Routledge Handbook of the History of Race in the American Military defines how the history of race and ethnicity impacts military history over time and comparatively while encouraging scholarship on specific groups, periods, and places. This important collection presents a comprehensive survey of the current state of the field.

A Short History of the United States of America Horace Elisha Scudder, 1901

A Short History of Dublin Richard Killeen, 2010-03-19

Explore Dublin's hidden history from the age of the Vikings to the present day with this bestselling short history of the city. It is the perfect tour companion. Dublin started as a Viking trading settlement in the middle of the tenth century. Location was the key as it commanded the shortest crossing to a major port in Britain. By the time the Normans arrived in Ireland in the twelfth century, this was crucial. Dublin maintained the best communications between the English crown and its new lordship in Ireland. The city first developed on the rising ground south of the river where Christ Church now is, and the English established their principal citadel, Dublin Castle, in this area. Throughout the medieval and early modern periods, the city's importance was entirely ecclesiastical and strategic. It was not a centre of learning or fashion or commerce. The foundation of

Trinity College in 1592 was a landmark event but the city did not really develop until the long peace of the eighteenth century. Then the series of fine wide Georgian streets and noble public buildings that are Dublin's greatest boast were built. A semi-autonomous parliament of the Anglo-Irish elite provided a focus for social life and the city flourished. The Act of Union of 1800 saw Ireland become a full part of the metropolitan British state, a situation not reversed until 1922. The Union years saw Dublin decline. Fine old houses were gradually abandoned by the aristocracy and became hideous tenement warrens. The city missed out on the Industrial Revolution. By the time Joyce immortalised it, it had become the centre of paralysis in his famous phrase. Independence restored some of its natural function but there was still much poverty and shabbiness. The 1960s boom proved to be a false dawn. Only since the 1990s has there been real evidence of a city reinventing and revitalising itself.
