Measurement and Recording of Historic Buildings Peter Swallow, Ross Dallas, Sophie Jackson, David Watt, 2016-04-01 Now in its second edition this book provides a practical guide to measured building surveys with special emphasis on recording the fabric of historic buildings It includes two new chapters dealing with modern survey practice using instruments and photographic techniques as well as a chapter examining recording methods as used on a specific project case study undertaken by the Museum of London Archaeology Service Measured surveys for producing accurate scaled drawings of buildings and their immediate surroundings may be undertaken for a variety of reasons The principal ones are to provide a historic record and to form the base drawings upon which a proposed programme of works involving repairs alterations adaptations or extensions can be prepared This book provides a practical guide to preparing measured surveys of historic buildings with special emphasis on recording the fabric The text assumes little previous knowledge of surveying and begins by describing basic measuring techniques before introducing elementary surveying and levelling From these principles the practices and techniques used to measure and record existing buildings are developed in a detailed step by step approach

covering sketching measuring plotting and drawing presentation For this new edition the text on hand survey methods has been revised to note where new techniques and equipment can be incorporated as well as explaining where more advanced survey methods may be best used to advantage Information on locating early maps and plans aerial photography and its uses documentary research procurement of surveys and conventional photography has been incorporated at various points as appropriate In addition Ross Dallas provides two new chapters dealing with modern survey practice using instruments and photographic techniques Also the opportunity has been taken to present a wider view of building recording projects by including a new chapter from the Museum of London Archaeological Service MoLAS building recording team It encompasses their five key principles for recording within an illustrative case study

Surveying Historic Buildings David

Watt,2015-07-17 This bestselling book has been fully revised and updated to include valuable new case studies and examples which help to demonstrate the common problems found in older buildings It features many additional photographs illustrating the decay mechanisms and individual issues associated with damp timber decay masonry defects roofing problems and many other aspects The book begins by summarizing the basics of surveying practice including the inspection assessment defect diagnosis and monitoring of defects It then examines the building elements discussing their construction typical faults and their diagnoses This section provides specific advice on assessing industrial monuments and features concise inspection checklists for ease of reference In the final section the author looks to the future considering the specific challenges faced by property professionals when employed to survey historic buildings The book is accompanied by comprehensive appendices including sample survey forms and a list of useful contacts is followed by an extensive bibliography This book will be of particular interest to conservation officers surveyors architects archaeologists and planners

Understanding Building Stones and Stone Buildings John A. Hudson,John W. Cosgrove,2019-04-24 This book covers the wide spectrum of subjects relating to obtaining and using building stones starting with their geological origin and then describing the nature of granites volcanics limestones sandstones flint metamorphic stones breccias and conglomerates with emphasis being placed on how to recognise the different stones via the many illustrated examples from Great Britain and other countries The life of a building stone is explained from its origin in the quarry through its exposure to the elements when used for a building to its eventual deterioration The structure of stone buildings is then discussed with explanations of the mechanics of pillars lighthouses and walls arches bridges buttresses and roof vaults plus castles and cathedrals The sequence of the historical architectural styles of stone buildings is explained from the early days through to postmodern buildings Special attention is paid to two famous architects the Roman Vitruvius and the English Sir Christopher Wren who designed and supervised the construction of St Paul's Cathedral in London To demonstrate many of the concepts presented two exemplary stone buildings are described in detail the Albert Memorial in London and Durham Cathedral in northern England The former building is interesting because it is comprised of a cornucopia of different building stones and the latter

building because of its architecture and sandstone decay mechanisms In the final Chapter ruined stone buildings are discussed the many reasons for their decay and the possibility of their rebirth via digital recording of their geometry The book has over 350 pages and is illustrated with more than 450 diagrams and colour photographs of both the various stones and the associated stone buildings Readers knowledge of the subject will be greatly enhanced by these images and the related explanatory text A wide ranging references and bibliography section is also included *Traditional Building Materials* Matthew Slocombe, 2012-07-20 Although steel and glass dominate modern cities Britain boasts innumerable beautiful examples of more traditional construction methods Many date from the period before easy nationwide transportation when materials were usually grown or extracted locally and as a result Britain has a varied legacy of vernacular buildings that reflects its multitude of different landscapes They display a rich and colorful palette of materials from the honey colored stone of the Cotswolds to the red earth of Devon and grey granite of Aberdeen In this book buildings historian Matthew Slocombe looks at the range of materials used for walls and roof coverings explores the processes involved in their extraction production and manufacture and outlines the diverse range of skills required for their use in construction

Building Networks: Exchange of Knowledge, Ideas and Materials in Medieval and Post-Medieval Europe Jeroen Bouwmeester, Laura Patrick, Duncan Berryman, 2024-02-19 This book aims to explore different aspects of networks in relation to the archaeology of buildings It is divided into three major themes the trade in materials the exchange of knowledge of techniques and or materials and the exchange of style Within each of these themes two primary aspects are addressed notably who were the actors and how did the network function In medieval and post medieval Europe the development of buildings of style and the use of material cannot be understood from a local regional or even national perspective Not only were the borders different than in modern day Europe but the contacts of inhabitants also transcended local and regional boundaries This volume describes the continuous exchange of aesthetic ideals technological developments and building materials during this period This volume is a culmination of four years of sessions held at the European Archaeology Association EAA conference between 2016 2020 on the topic It is of interest to archaeologists architects and scholars of built heritage *Traditional Buildings in the Oxford Region* John Steane, James Ayres, 2013-11-29 The pivotal position of the Oxford region in the geological and therefore building history of England is of fundamental importance to the study of traditional construction Oxford occupies a central position on the ancient route between Northampton and Southampton and on the east west road between London The West Country Wales and Ireland For this reason unusually for vernacular architecture the buildings of the region were subject to a wide range of influences This book the fruit of twenty years research provides an account of vernacular architecture in the Oxford region from Anglo Saxon times to the 19th century It begins with a discussion of methods and procedures followed by a description of building materials stone brick slate and

thatch This serves as an introduction to the heart of the book eleven chapters dealing with surveys of cruck buildings manorial and moated sites town houses with particular emphasis on Abingdon and houses in the countryside from farmhouses to cottages There are then chapters on fire hazards public houses and public buildings Several appendices are devoted to wall paintings ferramenta apotropaic marks carpentry details secrets under the floorboards fireplaces staircases and windows The book is richly and profusely illustrated with over 500 illustrations photographs maps and a particular strength a large number of drawings of architectural details and sketch perspectives *English Houses 1300-1800* Matthew H. Johnson, 2014-06-11 Houses are more than a shelter from the elements they also offer an unparalleled insight into the beliefs ideas and experiences of the people who built and lived in them In this engaging book Matthew Johnson looks at the traditional houses that still exist throughout the English countryside and examines the lives of the ordinary people who once occupied them His wide ranging narrative takes in the medieval hall and the community it framed the rebuilding and improvement of houses in the sixteenth and seventeenth centuries and the rise of the Georgian Order in both architecture and eighteenth century culture This passionate book is animated by the conviction that old houses are much more than just pretty tableaux of an idyllic unchanging rural England Vernacular houses are compared to their larger polite counterparts and English houses are placed in the wider context of the British Isles and the Atlantic world beyond The result is a dynamic compelling account of the development of houses in the English countryside and through this a portrait of changing patterns of social life from medieval to modern times Richly illustrated throughout with photographs and drawings this book will be of interest to anyone who wants to understand the significance of our built heritage and the historic landscape Traditional Construction for a Sustainable Future Carole Ryan, 2011-01-13 Since the spread of classical design and construction amongst the upper echelons of British society in the late seventeenth century traditional construction methods have largely fallen by the wayside Centuries later as the construction industry faces up to its environmental responsibilities this book explores its rich and ancient tradition to provide tried and trusted solutions to modern day construction problems By way of introduction the ancient and historical lifestyles that dictated the nature of traditional construction are explored before focussing on its health and ecological benefits As well as cultural background this book includes a detailed scientific description of traditional building materials and their constituents which draws a sharp contrast with modern petrochemical based materials The studies of traditional buildings included reveal the sustainability of features such as natural ventilation and breathing walls and comparisons with modern construction methods show how they could prevent sick building syndrome The author argues that maintenance for long life by contrast with the modern concept of life cycle costing is at the nub of sustainability and underlies the contribution traditional building construction can make to tackling climate change Over 250 original photos and over fifty bespoke diagrams illustrate the features techniques and characteristics of traditional construction that could make such a valuable contribution to the industry today The inclusion of a close study of how these methods relate to British

building regulations makes this book a practical guide for construction professionals as well as an authoritative resource for students and policy makers
