Terms, Themes, and Concepts Reuel R. Hanks, 2011-10-17 This text provides an essential reference handbook for students of geography and related social sciences How did the Greek geographer Eratosthenes make an accurate calculation of the earth's circumference more than 1 500 years before the first voyage of Columbus to the New World What are the green belts of England that dominate its rural landscape And what is regarded as the driest continent on the planet This handbook offers a broad coverage of terminology and concepts serving as both an encyclopedic dictionary of geography terms and an approachable overview to the human and physical aspects of world geography Approximately 150 geographic terms and concepts are defined and discussed providing an accessible reference for anyone who requires a deeper knowledge of the language and ideas that are important to geography as a discipline Helpful sidebars are provided to shed light on unusual or controversial theories and concepts All major geographic concepts and terms are addressed and comprehensively explained using examples

International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

Interpreting Our World Joseph J. Kerski, 2016-10-17 This important book demonstrates why geography matters in the modern day world through its examination of 100 moments throughout history that had a significant impact on the study of geography literally writing about the earth Geography is not simply accounts of the lands of

earth and their features it s about discovering everything there is to know about our planet This book shows why geography is of critical importance to our world s 21st century inhabitants through an exploration of the past and present discoveries that have been made about the earth It pinpoints 100 moments throughout history that had a significant impact on the study of geography and the understanding of our world including widely accepted maps of the ancient world writings and discoveries of key thinkers and philosophers key exploration events and findings during the Age of Discovery the foundations of important geographic organizations and inventions in digital mapping The book begins with a clear explanation of geography as a discipline a framework and a way of viewing the world followed by coverage of each of the 100 discoveries and innovations that provides sufficient background and content for readers to understand each topic The book concludes with a concise synopsis of why it all matters and a look forward to 10 possible future discoveries in the next 50 years of geography Students will gain a clear sense of what is truly revolutionary about geography perhaps challenging their preconceived notion of what geography actually is and grasp how important discoveries revolutionized not only the past but the present day as well Geography Framework for the 1994 and 2001 National Assessment of Educational Progress ,2000

Russian Refuge Susan Wiley Hardwick,1993-12-15 In 1987 when victims of religious persecution were finally allowed to leave Russia a flood of immigrants landed on the Pacific shores of North America By the end of 1992 over 200 000 Jews and Christians had left their homeland to resettle in a land where they had only recently been considered the enemy Russian Refuge is a comprehensive account of the Russian immigrant experience in California Oregon Washington Alaska and British Columbia since the first settlements over two hundred years ago Susan Hardwick focuses on six little studied Christian groups Baptists Pentecostals Molokans Doukhobors Old Believers and Orthodox believers to study the role of religion in their decisions to emigrate and in their adjustment to American culture Hardwick deftly combines ethnography and cultural geography presenting narratives and other data collected in over 260 personal interviews with recent immigrants and their family members still in Russia The result is an illuminating blend of geographic analysis with vivid portrayals of the individual experience of persecution migration and adjustment Russian Refuge will interest cultural geographers historians demographers immigration specialists and anyone concerned with this virtually untold chapter in the story of North American ethnic diversity Human Geography, an Introduction Laura Geller,1994 **An Introduction to the**
