Patterns Of American Culture:

American Cultural Patterns Edward C. Stewart, 1972 *Patterns of American Culture* Dan Rose, 1989 Dan Rose draws on the fact and metaphor of colonization to demonstrate that the central motive in the contemporary United States has been and continues to be the corporate form the purpose of which is to create new resources new products new landscapes new ideas and new markets These corporations determine who we are and what we can do Patterns for America Susan Hegeman, 1999-05-21 In recent decades historians and social theorists have given much thought to the concept of culture its origins in Western thought and its usefulness for social analysis In this book Susan Hegeman focuses on the term s history in the United States in the first half of the twentieth century She shows how during this period the term culture changed from being a technical term associated primarily with anthropology into a term of popular usage She shows the connections between this movement of culture into the mainstream and the emergence of a distinctive American culture with its own patterns values and beliefs Hegeman points to the significant similarities between the conceptions of culture produced by anthropologists Franz Boas Edward Sapir Ruth Benedict and Margaret Mead and a diversity of other intellectuals including Randolph Bourne Van Wyck Brooks Waldo Frank and Dwight Macdonald Hegeman reveals how relativist anthropological ideas of human culture which stressed the distance between modern centers and primitive peripheries came into alliance with the evaluating judgments of artists and critics This anthropological conception provided a spatial awareness that helped develop the notion of a specifically American culture She also shows the connections between this new view of culture and the artistic work of the period by among others Sherwood Anderson Jean Toomer Thomas Hart Benton Nathanael West and James Agee and depicts in a new way the richness and complexity of the modernist milieu in the United States **Four Overarching Patterns of Culture** Robert Strauss, Christopher Strauss, 2019-08-20 Justice has been the dominant cultural framework of people in the West for two centuries ever since the rise of constitutional democracies Consciously or not most people in the West have a strong awareness of right and wrong Their sense of morality is generally rooted in an obligation to the rule of law In democratic societies the rule of law ultimately relies on constitutional documents ratified by a widely accepted process of development and implementation For millennia honor has been the dominant cultural framework of most people in the East and Middle East Here people know that speech and behavior display respect or disrespect While pervasive in all relationships honor and shame are most important in the family extended family and local community In the East honor is not necessarily an internal feeling as it is in a justice culture Honor is more often an external attribution bestowed by others rather than claimed by oneself Harmony is prevalent globally in indigenous cultures Many indigenous peoples do not distinguish between the supernatural and natural worlds All aspects of life are connected Interactions with spirit beings are the key to maintaining harmony in order to be secure Reciprocity is a common cultural framework in the Global South Here one learns to develop connections with the right people in given circumstances for needed resources These connections may

or may not be characterized as friendships and provide not so much close friendships as reciprocal exchange In some places reciprocity is the means whereby one survives **American Cultural Patterns** Edward C. Stewart, Milton J. Bennett, 1994

Process and Pattern in Culture Robert A. Manners, 2017-07-12 This festschrift commemorates Julian H Steward The essays were contributed by former students colleagues and other anthropologists whose research or thinking has been influenced by him There was no preconceived attempt to give the volume any greater sense of unity or to impose upon the contributors any restrictions as to subject matter On the contrary each author was urged to write on an anthropological topic of greatest current interest to himself Many of the essays could be placed just as handily within a division other than the one to which they have arbitrarily been assigned in the book This kind of interchangeability may reflect in some measure the interrelatedness of Steward s contributions to anthropological theory The broad relevance of all the selections to Steward s work could reflect also the extent to which his interests continue to be reflected in the work of anthropologists influenced by him It could also reflect a parallelism of theoretical concerns within the profession that stem from the cultural ambience that produced Steward himself Parallelisms and convergence are aspects of the kind of cultural determinism which has claimed Steward s attention during the many years that he fought a fairly lonely battle to establish the respectability of evolutionism in anthropology Now that respectability has been achieved with an almost bandwagon fervor it is clear that Steward as much as anyone else in anthropology was responsible for the change The essays in this collection are at once a vindication of his patience an evidence of the high status he enjoys among anthropologists and a testimony to the impact of his unusual creativity on his colleagues **The Marines, Counterinsurgency, and Strategic Culture** Jeannie L. Johnson, 2018-05-01

The United States Marine Corps has a unique culture that ensures comradery exacting standards and readiness to be the first to every fight Yet even in a group that is known for innovation culture can push leaders to fall back on ingrained preferences Jeannie L Johnson takes a sympathetic but critical look at the Marine Corps s long experience with counterinsurgency warfare Which counterinsurgency lessons have been learned and retained for next time and which have been abandoned to history is a story of battlefield trial and error but also a story of cultural collisions The book begins with a fascinating and penetrating look inside the culture of the Marine Corps through research in primary sources including Marine oral histories and interviews with Marines Johnson explores what makes this branch of the military distinct their identity norms values and perceptual lens She then traces the history of the Marines counterinsurgency experience from the expeditionary missions of the early twentieth century through the Vietnam War and finally to the Iraq War Her findings break new ground in strategic culture by introducing a methodology that was pioneered in the intelligence community to forecast behavior Johnson shows that even a service as self aware and dedicated to innovation as the Marine Corps is constrained in the lessons learned process by its own internal predispositions by the wider US military culture and by national preferences Her findings challenge the conclusions of previous counterinsurgency scholarship that ignores culture This highly readable

book reminds us of Sun Tzu's wisdom that to be successful in war it is important to know thyself as well as the enemy. This is a must read for anyone interested in the Marines Corps counterinsurgency warfare, military innovation or strategic culture.

Process and Pattern in Culture Robert Alan Manners, Julian Haynes Steward, This festschrift commemorates Julian H Steward. The essays were contributed by former students, colleagues and other anthropologists whose research or thinking has been influenced by him. There was no preconceived attempt to give the volume any greater sense of unity or to impose upon the contributors any restrictions as to subject matter. On the contrary, each author was urged to write on an anthropological topic of greatest current interest to himself. Many of the essays could be placed just as handily within a division other than the one to which they have arbitrarily been assigned in the book. This kind of interchangeability may reflect in some measure the interrelatedness of Steward's contributions to anthropological theory. The broad relevance of all the selections to Steward's work could reflect also the extent to which his interests continue to be reflected in the work of anthropologists influenced by him. It could also reflect a parallelism of theoretical concerns within the profession that stem from the cultural ambience that produced Steward himself. Parallelisms and convergence are aspects of the kind of cultural determinism which has claimed Steward's attention during the many years that he fought a fairly lonely battle to establish the respectability of evolutionism in anthropology. Now that respectability has been achieved with an almost bandwagon fervor, it is clear that Steward as much as anyone else in anthropology was responsible for the change. The essays in this collection are at once a vindication of his patience, an evidence of the high status he enjoys among anthropologists and a testimony to the impact of his unusual creativity on his colleagues.

Organizational Behavior O. Jeff Harris, Sandra J. Hartman, 2001. This text uses realistic case examples, discussion questions and self tests to illustrate principles of workplace psychology. Each chapter begins by posing a difficult work situation which may be a conflict, a motivation problem or an issue of diversity, then goes on to discuss principles and theories that apply to the case, covering areas of ethics, problem employees and organizational culture as well as neglected areas such as the physical atmosphere of the workplace, the effects of new technologies on workers and workplace gossip. Harris teaches management at the University of Louisiana, Monroe; Hartman at the University of New Orleans. Annotation copyrighted by Book News Inc., Portland, OR.

Anthropologists and the Rediscovery of America, 1886-1965 John S. Gilkeson, 2010-09-20. This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established. Five chapters trace the development within academic anthropology of the concepts of culture, social class, national character, value and civilization and their dissemination to non anthropologists. As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's "the best which has been thought and said," so too did they come to see American communities as stratified into social classes distinguished by their

subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective
