Latin America and the Origins of Its Twenty-First Century Michael Monteón, 2009-12-30 Latin American societies were created as pre industrial colonies that is peoples whose cultures and racial makeup were largely determined by having been conquered by Spain or Portugal In all these societies a colonial heritage created political and social attitudes that were not conducive to the construction of democratic civil societies And yet Latin America has a public life not merely governments but citizens who are actively involved in trying to improve the lives and welfare of their populations Monteón focuses on the relation of people s lifestyles to the evolving pattern of power relations in the region Much more than a basic description of how people lived this book melds social history politics and

economics into one creating a full picture of Latin American life There are two poles or markers in the narrative about people's lives the cities and the countryside Cities have usually been the political and cultural centers of life from the conquest to the present Monteiou concentrates on cities in each chronological period allowing the narrative to explain the change from a religiously centered life to the secular customs of today from an urban form organized about a central plaza and based on walking to one dominated by the automobile and its traffic Each chapter relates the connections between the city and its countryside and explains the realities of rural life Also discussed are customs diets games and sports courting and marriage and how people work

Development In Theory And Practice Jan Knippers Black, 2018-02-12 As wealthy countries focus more attention on the ravages of poverty and maldistribution of the world's resources the rationales for what is or is not done in the name of development have become more elaborate and abstract And as the literature has proliferated communication among those who approach development from different perspectives disciplines and professions has become more strained In this innovative text Jan Black argues that what is missing is appropriate theory that can help place the findings of social scientists and seasoned development practitioners at the service of those who would promote a more equitable and empowering approach to development In the first section the author presents the differing and even contradictory definitions of development and the various explanatory models and means of measurement associated with them This is followed by an analysis of the evolution of development strategies and programs both of the First World donor countries and organizations and of Third World leaders movements and regional organizations The author highlights key issues in the development debate of the 1990s including ecology refugees debt the informal sector and gender roles In a final section she addresses the process of development and illustrates through a number of vignettes and case studies the sometimes illusory links between motives and consequences The second edition includes more paradoxes and case studies and increased coverage of refugees and indigenous peoples More information on the new states in post Soviet East and Central Europe is also incorporated At a time when theoreticians and practitioners appear to occupy different worlds and speak different languages and when a large number of developing countries seem to be falling into an irreversible cycle of debt and dependency this book is particularly welcome and compelling
