Verb Valency Patterns

Susen Faulhaber, 2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs The semantic parallels of the verbs selected are based on their coverage in dictionaries first and foremost the Valency Dictionary of English Herbst Heath Roe and G tz 2004 as well as corpus research and native speaker assessments It is demonstrated that despite obvious similarities in complementation between such verbs there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors such as selection restrictions and aspectual properties do not sufficiently correlate with the verbs syntactic properties and consequently do not have sufficient explanatory power Thus the results rigorously challenge so called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis In the light of a general trend towards placing greater emphasis on semantic aspects in the fields of construction grammar and cognitive grammar too the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule based generation As such it stresses the necessity of finding ways to systematically account for item specific properties of verbs in any grammatical theory of the English language The book is targeted at all linguists interested in the relationship between semantics and syntax which is one of the prevalent questions in modern linguistics also in the field of construction grammar and cognitive grammar Since the data is presented in a way which is compatible with various theories of complementation the target group is clearly not restricted to any specific linguistic school Because of the large amount of item specific information presented this book is also a valuable source for grammarians and lexicographers

Putting Intellectual

Property in Its Place Laura J. Murray, S. Tina Piper, Kirsty Robertson, 2014-03 Putting Intellectual Property in its Place

examines the relationship between creativity and intellectual property law on the premise that despite concentrated critical attention devoted to IP law from academic policy and activist quarters its role as a determinant of creative activity is overstated. The effects of IP rights or law are usually more unpredictable, non-linear or illusory than is often presumed. Through a series of case studies focusing on nineteenth century journalism, fake art, plant hormone research, between the wars online knitting communities, creativity in small cities and legal practice, the authors discuss the many ways people comprehend the law through information and opinions gathered from friends, strangers, coworkers and the media. They also show how people choose to share, create, negotiate and dispute based on what seems fair, just or necessary in the context of how their community functions in that moment while ignoring or reimagining legal mechanisms. In this book, authors Murray Piper and Robertson define the everyday life of IP law, constituting an experiment in non-normative legal scholarship and in building theory from material and located practice.

Victimology William G. Doerner, Steven P. Lab, 2024-08-06

Victimology Tenth Edition covers the scope of crime victims suffering in the US, offering a history of victims and the measurement of victimization, an explanation of the victim's role in the criminal justice process and a recounting of the issues crime victims face as a result of crime and involvement in the criminal justice process. Doerner and Lab, both well-regarded scholars, write compellingly about how the current criminal justice system can be transformed into a victim's justice system. Theory is woven together with the description of each topic, and specific examples illustrate each point. The book goes on to address the full impact of victimization, and a final section details specific types of victimization ranging from violent crimes including child and elder abuse to property crime to crime in the school and in the workplace. The authors explain how obstacles hinder the pursuit of justice and provide significant policy and programming suggestions to render the system more victim-friendly. Appropriate for undergraduate as well as early graduate students in *Victimology* courses, in *Criminology*, *Criminal Justice*, *Sociology* and *Justice Studies* programs, this book offers instructor's aides with test bank and PowerPoint lecture slides as well as a companion site with student resources.
