The Brain-Eye Eric Alliez, 2015-12-11 A detailed and inventive study of the thinking at work in modern painting drawing on a formidable body of scholarly evidence to challenge modernist and phenomenological readings of art history The Brain Eye presents a series of interlinked case studies in which philosophical thought encounters the hallucinatory sensations unleashed by painter researchers Rather than outlining a new philosophy of art The Brain Eye details the singular problems pursued by each of its protagonists Striking readings of the oeuvres of Delacroix Seurat Manet

Gauguin and Cézanne recount the plural histories of artists who worked to free the differential forces of colour discovered by Goethe in his Colour Theory in the name of a true hallucination and of a logic proper to the Visual. A rigorous renewal of the philosophical thinking of visual art. The Brain Eye explores the complex relations between concept and sensation theory and practice the discursive and the visual and draws out the political and philosophical stakes of the aesthetic revolution in modern painting.

From publisher *Francis Bacon* Gilles Deleuze, 2005-01-01 Francis Bacon is Deleuze's long awaited work on Bacon widely regarded as the one of the most radical painters of the twentieth century. The book presents a deep engagement with Bacon's work and the nature of art. Deleuze analyses the distinctive innovations that came to mark Bacon's style while introducing a number of his own famous concepts. Deleuze links Bacon's work to Cézanne's notion of a logic of sensation which reaches its summit in colour. Investigating this logic Deleuze explores Bacon's crucial relation to past painters such as Velasquez Cézanne and Soutine as well as Bacon's rejection of expressionism and abstract painting.

Symbolism, Its Origins and Its Consequences Rosina

Neginsky,2010-08-11 The notion of the symbol is at the root of the Symbolist movement but this symbol is different from the way it was used and understood in the Middle Ages and Renaissance In the Symbolist movement a symbol is not an allegory The Belgian writer Maurice Maeterlinck defined its essence in an article that appeared on April 24 1887 in L Art moderne He wrote that the notion of a symbol in the Symbolist movement is the opposite of the notion of the symbol in classical usage instead of going from the abstract to the concrete Venus incarnated in the statue represents love it goes from the concrete to the abstract from what is seen heard felt tasted and sensed to the evocation of the idea This volume attempts to give a glimpse into the power of the Symbolist movement and the nature of its fundamental and interdisciplinary role in the evolution of art and literature of the twentieth century It records the studies of a group of scholars who met and discussed these topics together for the first time in 2009 While illuminating the specificity of Symbolism in art architecture and literature in different European countries these articles also demonstrate the crucial role of French Symbolism in the development of the international Symbolist movement The authors hope that an expanding group a society of Art Literature and Music in Symbolism and Decadence ALMSD born out of the first meeting will continue to further this discussion at future conferences and in the printed conference proceedings *Delphi Complete Works of Paul Gauguin (Illustrated)* Paul Gauguin,Peter Russell,2016-12-08 [www delphiclassics com](http://www.delphiclassics.com)
