Paul Valéry, Philosophical Reflections William Kluback, 1987 Where the philosopher has feared to tread in a realm that has been declared not only non philosophical but anti philosophical this study attempts quietly to illuminate Paul Valéry's reflections on literature painting sculpture and poetry Professor Kluback ventures into this world of aesthetic insights which has often seemed reserved only for the artist and off limits to the philosopher whose explorations tend increasingly to be confined to the technicalities of logic and dialectic **Folly and Intelligence in Political Thought** William Kluback, 1990 A serious and profound discussion of some of the more important problems of modern thought readable and truly enjoyable Wherever the reader turns he is captivated by the originality of thought and its applicability to contemporary events This is a unique and distinguished book well worth the reader's time **Discourses on the Meaning of History** William Kluback, 1988 Philosophical and Theological essays explore the meaning of history The author believes that both Philosophy and Theology offer ways to understand the meaning of history History is our most important intellectual and moral problem From where we begin to comprehend the significance for man reveals our capacity to understand history Forthcoming Books Rose Arny, 1996-06 **American Book Publishing Record**, 1988 **Subject Guide to Books in Print**, 2001 Undefined Familiarities William Kluback, 1989 Insightful and fascinating studies of great men of French literature introduce the reader to that wonderful dialogue that takes place between writer and works of literature Here we find that creative conversation which enchants the mind and forces it to become more deeply aware of its own creative reality The discovery of the mind as a creative entity is man's most precious acquisition This book is devoted to this creative activity *Books in Print*, 1991 *Forschungen zu Paul Valéry*, 1993 *Books in Series, 1876-1949* R.R. Bowker Company, 1982 **Books in Series**, 1985 Vols for 1980 issued in three parts Series Authors and Titles "Le roman de Karin et Paul" Hélène Marie Julien, 2000 **Répertoire bibliographique de la philosophie**, 1989 **Bibliographisch repertorium**, 1989 Reason and Being Boris G. Kuznetsov, 2013-06-29 Boris Kuznetsov was a scientist among humanists a philosopher among scientists a historian for those who look to the future an optimist in an age of sadness He was steeped in classical European culture from earliest times to the latest avant garde and he roamed through the ages an inveterate time traveller chatting and arguing with Aristotle and Descartes Heine and Dante among many others Kuznetsov was also in his intelligent and thoughtful way a Marxist scholar and a practical engineer a patriotic Russian Jew of the first sixty years of the Soviet Union Above all he meditated upon the revolutionary developments of the natural sciences throughout history to be sure but particularly in his own time the time of what he called non classical science and of his beloved and noblest hero Albert Einstein Kuznetsov was born in Dnepropetrovsk on October 5 1903 then Yekaterinoslav By early years he had begun to teach first in 1921 at an institute of mining engineering and then at other technological institutions By 1933 he had received a scientific post within the Academy of Science of the U S S R and then at the end of the Second World War he joined several

colleagues at the new Institute of the History of Science and Technology For more than 40 years he worked there until his death two years ago American Book Publishing Record Cumulative, 1950-1977: Non-Dewey decimal classified titles R.R. Bowker Company. Department of Bibliography, 1978 **The Seduction of Unreason** Richard Wolin, 2019-04-30 Ever since the shocking revelations of the fascist ties of Martin Heidegger and Paul de Man postmodernism has been haunted by the specter of a compromised past In this intellectual genealogy of the postmodern spirit Richard Wolin shows that postmodernism's infatuation with fascism has been extensive and widespread He questions postmodernism's claim to have inherited the mantle of the Left suggesting instead that it has long been enamored with the opposite end of the political spectrum Wolin reveals how during in the 1930s C G Jung Hans Georg Gadamer Georges Bataille and Maurice Blanchot were seduced by fascism's promise of political regeneration and how this misapprehension affected the intellectual core of their work The result is a compelling and unsettling reinterpretation of the history of modern thought In a new preface Wolin revisits this illiberal intellectual lineage in light of the contemporary resurgence of political authoritarianism **A Scion of the Times** Leon Schwartz, 2010-09 **The New Encyclopaedia Britannica: Macropaedia (19 v.)**, 1983 Conspiracy and Contingency Thorsten Botz-Bornstein, 2025-05-13 What do conspiracy theories algorithms and meritocracy have in common All three avoid contingency and frantically look for necessities The COVID 19 crisis has brought about a proliferation of conspiracy theories that reject among other things official accounts of the virus's origins and remedies and sometimes even the existence of the virus itself Conspiratorial thinking usually links events to secret plots concocted by powerful conspirators whether it be Bill Gates or Big Pharma In this book I point to another dominant driving force the desire to find simple and apparently reasonable explanations for phenomena that are actually purely random and contingent Often unfounded conspiracy theories emerge because contingency is not accepted and necessities are looked for at all costs Nothing happens by chance and there must be a plan or an intelligent design behind everything This book deals with contingency phobia This special phobia is not only manifest in most unwarranted conspiracy theories but it also appears in Western culture as a recurrent psychological cognitive and scientific pattern It is the cause of a variety of other phenomena that have become emblematic for liberal democracies such as the contemporary algorithm culture or the obsession with merit and ranking Not only the conspiratorial mindset rejects a world of contingency and strives to create a universe structured by a necessary order life coaches algorithm engineers and neoliberal meritocrats all do the same This book analyses these phenomena by using the same criteria how do humans deal with contingency and how do they try to establish necessities Some philosophies such as Daoism and Zen Buddhism make unwarranted conspiracy theories quasi impossible because they find original ways of combining contingency with ontological theological or cosmological premises I identify sources that other disciplines examining conspiracy theories for example political science anthropology psychology or sociology have rarely seen as primary Political scientists focus on the macro level and construe conspiracy theories mostly as

national or regional phenomena whereas anthropologists psychologists and sociologists tend to focus on the micro level The present study is an example of practical philosophy depicting conspiratorial thinking as an organic or a dynamic phenomenon by crystallising cognitive and cultural necessity contingency patterns that can be found in politics culture religion and science
