wartime technologies to peacetime use exemplified by Charles and Ray Eames's plywood and fiberglass furniture. The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood, and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel Green, and Architectural Pottery, as well as other previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. *The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07

The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard Le Corbusier, Lynch, and Jacobs, to more recent writings by Waldheim, Koolhaas, and Sorkin. Following the widespread success of the first edition of *The Urban Design Reader*, this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that

address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

**Environmental Design** Avigail Sachs, 2018-08-15 Much of twentieth century design was animated by the creative tension of its essential duality is design an art or a science In the postwar era American architects sought to calibrate architectural practice to evolving scientific knowledge about humans and environments thus elevating the discipline's stature and enmeshing their work in a progressive restructuring of society This political and scientific effort was called environmental design a term expanded in the 1960s to include ecological and liberal ideas In her expansive new study Avigail Sachs examines the theoretical scaffolding and practical legacy of this professional effort Inspired by Lewis Mumford's 1932 challenge enjoining architects to go beyond visual experimentation and create complete human environments Environmental Design details the rise of modernist ideas in the architectural disciplines within the novel context of sociopolitical rather than aesthetic responsibilities Unlike today's architects environmental designers saw themselves as orchestrators of decision making more than auteurs of form and style Viewing architectural practice as rooted in Progressive Era politics and the democratic process rather than the European avant garde Sachs plots how these social concepts spread via influential architecture schools This rich examination of pedagogy and practice is a map to both the history of environmental design and the contemporary consequences of architecture understood as a pressing social concern Interiors, 2000-07 **Building**
