Code of Ethics for Nigerian Journalists ,1998 The Search for Earth's Twin Stuart G. Clark,2016 In 1995 two Swiss astronomers discovered a planet circling a star other than our Sun This changed our perception of the Universe forever proving that Earth and the other celestial bodies in our Solar System are not alone in outer space Now after two decades of exploration more than 860 planets have been discovered many of which are completely unlike anything else we know Some are blacker than coal some are bathed in molten lava others are perpetually scoured by hurricane force winds some have not one sun but two that rise in the morning and others are perpetually drowned in global oceans But as well as strange uninhabitable lands there is familiarity too Some of these alien worlds are strikingly similar to planets in our Solar System Astronomers now know of planets just like Jupiter Neptune Mars and Mercury orbiting stars similar to our Sun both nearby and deep into space Authoritatively written and fully up to date on this fast moving area of science The Search for the Earth s Twin will take you on a journey through the cosmos via frozen wastelands slow moving globes and fiery volcanic bodies to planets that can and just might sustain complex life The prospect of discovering the Earth s twin is now tantalisingly close

Earths of Distant Suns Michael Carroll,2016-10-03 Based on the latest missions results and supported by commissioned artwork this book explores the possible lessons we may learn from exoplanets As the number of known Earth like objects grows significantly the author explores what is known about the growing roster of pale blue dots far afield Aided by an increased sensitivity of the existing observatories recent discoveries by Keck the Hubble Space Telescope and Kepler are examined These findings once thought to be closer to the realm of science fiction have fired the imaginations of the general public as well as scientists All of us are mesmerized by the possibility of other Earth like worlds out there Author Michael Carroll asks the tough questions of what the expected gain is from identifying these Earth analogs spread across the Universe and the reasons for studying them Potentially they could teach us about our own climate and Solar System Also explored are the more remote options of communication between or even travel to these distant yet perhaps not so dissimilar worlds Women and New and Africana Religions Lillian Ashcraft-Eason,Darnise Martin,Oyeronke Olademo,2009-10-27

This volume explores the lives of women around the world from the perspective of the New and Africana faiths they practice This probing and thought provoking series of essays brings together in one volume the multifaceted experiences of women in the New and Africana religions as practiced today With this work religion becomes a lens for examining the lives of women of diverse ethnicities and nationalities across the social spectrum In Women and New and Africana Religions readers hear from women from a number of religious spiritual persuasions around the world including Africa Asia the Caribbean South America and North America These voices form the core of remarkable explorations of family and environment social and spiritual empowerment sexuality and power and ways in which worldview informs roles in religion and society Each essay includes scene setting historical and social background information and fascinating insights from renowned scholars sharing their

Exoplanets C. R. Kitchin, 2011-12-02 Exoplanets Finding Exploring and Understanding Alien Worlds probes the basis for possible answers to the fundamentals questions asked about these planets orbiting stars other than our Sun This book examines what such planets might be like where they are and how we find them Until around ten years ago the only planets that we knew about were within the Solar System The first genuine planet beyond the confines of the Solar System was discovered only 1988 Since then another 350 or so exoplanets have been detected by various methods and most of these haven been found in the last ten years Although many more exoplanets discoveries may be expected to occur even as this book is being read a large enough data set is now available to form the basis for an informed general account of exoplanets The topic hence is an extremely hot one all the more so because the recently launched Kepler spacecraft should soon start uncovering many more exoplanets some perhaps

Preston, 2016-06-16 Highly recommended Financial Times Today we know of only a single planet that hosts life the Earth But
across a Universe of at least 100 billion possibly habitable worlds surely our planet isn't the only one which like the porridge
Goldilocks sought is just right for life Astrobiologists search the galaxy for conditions that are suitable for life to exist
focusing on similar worlds located at the perfect distance from their Sun within the aptly named Goldilocks Zone Such a
place might have liquid water on its surface and may therefore support a thriving biosphere What might life look like on
other worlds It is possible to make best guesses using facts rooted in science and by studying extremophiles organisms such
as the near indestructible water bears which can survive in the harshest conditions that Earth and even space can offer
Goldilocks and the Water Bears is a tale of the origins and evolution of life and the quest to find it on other planets on moons
in other galaxies and throughout the Universe *Mysteries of the Universe - 2nd Edition: Answerable and Unanswerable
Questions* Peter Altman, 2024-01-17 Does alien life exist Is time travel possible How did the Universe begin and how might it
end Is the future pre determined These are just some of the fascinating questions posed in this richly illustrated book which
stretches across physics biochemistry and cosmology Each chapter considers a separate question and ends either with an
answer or if there is insufficient evidence for an answer the author gives his best guess answer This new second edition apart
from being updated also includes answers given by the ChatGPT artificial intelligence chatbot For every question be it time
travel multiple Universes inter galactic travel or the end of the world the author has tried to cover all possibilities before
arriving at a conclusion Everyone will have their own opinion but one thing is certain *Mysteries of the Universe* will fascinate
educate and stimulate And as a free gift to readers the author has included an original science fiction short story at the end of
the book
