The Failures of Ethics John K. Roth, 2015-07-30 Defined by deliberation about the difference between right and wrong, encouragement not to be indifferent toward that difference, resistance against what is wrong and action in support of what is right, ethics is civilization's keystone. *The Failures of Ethics* concentrates on the multiple shortfalls and shortcomings of thought, decision and action that tempt and incite us, human beings, to inflict incalculable harm. Absent the overriding of moral sensibilities, if not the collapse or collaboration of ethical traditions, the Holocaust, genocide and other mass atrocities could not have happened. Although these catastrophes do not pronounce the death of ethics, they show that ethics is vulnerable, subject to misuse and perversion, and that no simple reaffirmation of ethics as if nothing disastrous had happened will do. Moral and religious authority has been fragmented and weakened by the accumulated ruins of history and the depersonalized advances of civilization that have taken us from a bloody twentieth century into an immensely problematic twenty first. What nevertheless remain essential are spirited commitment and political will that embody the courage not to let go of the ethical but to persist for it in spite of humankind's self-inflicted destructiveness. Salvaging the fragmented condition of ethics, this book shows how respect and honor for those who save lives and resist atrocity deepened attention to the dead and to death itself and appeals for human rights and renewed spiritual sensitivity confirm that ethics contains and remains an irreplaceable safeguard against its own failures.

Narratives of Resistance Ana María Manzanás Calvo, Jesús Benito Sánchez, 1999 The articles included in this collection cover a wide range of literatures and topics but most of them address the ways in which ethnic writers create themselves in opposition and resistance to the mainstream These narratives of opposition and resistance do not equate protest narratives but represent a consciously subversive effort There is agency and creativity in the confrontation for the majority of these narratives are not only demystifying an old world and order but creating a new one there narratives are not reproducing as much as producing and forging culture and literature The articles we present resist not only the politics of traditional canon formation but the politics of cultural nationalism as well they challenge the margins as well as the center With this revisionist agenda the aim of this collection is to invite readers to further their rethinking of American and Caribbean literatures
