Be All You Can Be Shawn E. Hamilton, 2014-03 There is something sad about a person who blindly sacrifices his life for his country for he is unaware of the real issues If a person can grasp the truth about war it can't help but color his thinking on such issues as draft dodging The name draft dodger suggests the evasion of a just debt or obligation In reality a draft dodger is either a person who rejects military service on religious or moral grounds or plainly doesn't want to allow himself to be killed Any of those reasons should be good enough and I don't think that he should be persecuted or prosecuted A person who is willing to sacrifice his life for his country is merely a dupe in the profit game of the military industrial complex A man who has the courage to stand up against such twisted idealism and refuse to be sacrificed for profiteers is no coward My opinion of the draft dodger differs from the opinion of many of my peers but then my generation is probably one of the biggest collections of fools on record Major Ralph E Hamilton WW2 Veteran 1976 *The Virtual Weapon and International Order* Lucas Kello, 2017-09-26 An urgently needed examination of the current cyber revolution that draws on case studies to develop conceptual frameworks for understanding its effects on international order The cyber revolution is the revolution of our time The rapid expansion of cyberspace brings both promise and peril It promotes new modes of political interaction but it also disrupts interstate dealings and empowers non state actors who may instigate diplomatic and military crises Despite significant experience with cyber phenomena the conceptual apparatus to analyze understand and address their effects on international order remains primitive Here Lucas Kello adapts and applies international relations theory to create new ways of thinking about cyber strategy Kello draws on a broad range of case studies including the Estonian crisis the Olympic Games operation against Iran and the cyber attack against Sony Pictures Synthesizing qualitative data from government documents forensic reports of major incidents and interviews with senior officials from around the globe this important work establishes new conceptual benchmarks to help security experts adapt strategy and policy to the unprecedented challenges of our times
