The Gurob Ship-Cart Model and Its Mediterranean Context Shelley Wachsmann,2013-01-09 When Shelley Wachsmann began his analysis of the small ship model excavated by assistants of famed Egyptologist W M F Petrie in Gurob Egypt in 1920 he expected to produce a brief monograph that would shed light on the model and the ship type that it represented Instead Wachsmann discovered that the model held clues to the identities and cultures of the enigmatic Sea Peoples to the religious practices of ancient Egypt and Greece and to the oared ships used by the Bronze Age Mycenaean Greeks Although found in Egypt the prototype of the Gurob model was clearly an Aegean style galley of a type used by both the Mycenaeans and the Sea Peoples The model is the most detailed representation presently known of this vessel type which played a major role in changing the course of world history Contemporaneous textual evidence for Sherden one of the Sea Peoples settled in the region suggests that the model may be patterned after a galley of that culture Bearing a typical Helladic bird head decoration topping the stempost with holes along the sheer strakes confirming the use of stanchions the model was found

with four wheels and other evidence for a wagon like support structure connecting it with European cultic prototypes The online resources that accompany the book illustrate Wachsmann's research and analysis They include 3D interactive models that allow readers to examine the Gurob model on their computers as if held in the hand both in its present state and in two hypothetical reconstructions The online component also contains high resolution color photos of the model maps and satellite photos of the site and other related materials Offering a wide range of insights and evidence for linkages among ancient Mediterranean peoples and traditions The Gurob Ship Cart Model and Its Mediterranean Context presents an invaluable asset for anyone interested in the complexities of cultural change in the eastern Mediterranean at the end of the Bronze Age and the beginning of the Iron Age The Gurob ship cart model is was part of an exhibition entitled Beyond the Nile Egypt and the Classical World at the J Paul Getty Center March 27 September 9 2018 Read about it here <http://blogs.getty.edu/iris/egyptian-ship-model-sheds-light-on-bronze-age-warfare-and-religion/> Digital supplement to the book featuring 3D models <http://www.vizin.org/Gurob/Gurob.html>

[Scribal Repertoires in Egypt from the New Kingdom to the Early Islamic Period](#) Jennifer Cromwell, Eitan Grossman, 2018 Scribal Repertoires in Egypt from the New Kingdom to the Early Islamic Period deals with the possibility of glimpsing pre modern and early modern Egyptian scribes the actual people who produced ancient documents through the ways in which they organized and wrote those documents While traditional research has focused on identifying a pure or original text behind the actual manuscripts that have come down to us from pre modern Egypt the volume looks instead at variation different ways of saying the same thing as a rich source for understanding the complex social and cultural environments in which scribes lived and worked breaking with the traditional conception of variation in scribal texts as free or indicative of corruption As such it presents a novel reconceptualization of scribal variation in pre modern Egypt from the point of view of contemporary historical sociolinguistics seeing scribes as agents embedded in particular geographical temporal and socio cultural environments Introducing to Egyptology concepts such as scribal communities networks and repertoires among others the authors then apply them to a variety of phenomena including features of lexicon grammar orthography palaeography layout and format After first presenting this conceptual framework they demonstrate how it has been applied to better studied pre modern societies by drawing upon the well established domain of scribal variation in pre modern English before proceeding to a series of case studies applying these concepts to scribal variation spanning thousands of years from the languages and writing systems of Pharaonic times to those of Late Antique and Islamic Egypt

**The Late New Kingdom in Egypt (c.**

**1300-664 BC)** M. L. Bierbrier, 2024-07-15 The period of Egypt's Ramesside empire is best known for its foreign wars and monumental buildings but the chronological history of many of its rulers and pre-eminent priests and their genealogies was poorly understood. While it was not possible to fix the chronology exactly, a combination of known dates or date ranges such as for the accession of Ramesses II and the determination of family trees that extended over a large period enabled Bierbrier to present a much closer definition of the span of individual dynasties and their key figures than had been possible previously. That volume is reissued here in facsimile. An important source of information is the genealogical references on funerary statues and tomb paintings though vocabulary used is limited and often ambiguous. There are also several types of statuary set up by individuals for different purposes most frequently by sons or descendants to cause the name of the deceased to live on many of which may have been created before the death of the individual commemorated. Taking into account these and other difficulties Bierbrier's painstaking research proved groundbreaking in elucidating the chronology, sequences of events and family connections of the period from the official families of the XIXth Dynasty through those of the XXVth.
