Reading and Reasoning DOWNING, 2013-11-11 I have written this book to put forward a new theory of reading the cognitive clarity theory But the book is not all theory I have tried to show how this theory can help students teachers and parents to improve children's education in reading at home and at school Although the cognitive clarity theory is new it is derived from other theories and from a wide range of educational linguistic and psychological research The cognitive clarity theory is thus a bringing together of the insights of many colleagues in these disciplines What the theory owes to these colleagues is clearly acknowledged as the evidence is presented But I must also be thankful for the experiences that have led me in this direction I worked as a school teacher for nearly ten years before I became an experimental psychologist During my years as a teacher I was often baffled by children's difficulties in learning to read Then only two or three years after qualifying in psychology I had the good fortune to be chosen to plan and conduct the first large scale experiment on children's reading in Britain
