Summaries of Foreign Government Environmental Reports ,1977 **ERDA Fiscal Year 1978 Authorization** United States. Congress. Senate. Committee on Energy and Natural Resources. Subcommittee on Energy Research and Development,1978 **Access to Energy** Melvin A. Conant,2021-12-14 Conant explores how the transformation of oil from a commercial commodity to a strategic raw material have changed the face of world energy politics In an increasingly interdependent world Conant questions the right of any nation to withhold vital supplies from other countries Dictionary of Environmental Law Alan Gilpin,2000-01-01 There is no shortage of recent dictionaries covering environmental law on reference shelves What distinguishes this titles is its inclusive coverage of the international scene For example where all environmental law dictionaries have an entry for acid rain Gilpin s Dictionary informs the reader about acid rain problems in Sweden Norway Germany and The Netherlands in addition to the United States and Canada This Dictionary is useful with balanced coverage of environmental issues throughout the world due to its global inclusiveness and clear nontechnical language this dictionary should prove very useful on shelves of all types of libraries and for environmental political and legal practitioners Georgia Briscoe American Reference Books Annual 2002 Gilpin addresses the elements of environmental law

with an indispensable survey of the subject The strength of this dictionary lies in its international coverage Language is nontechnical and easily accessible to general readers Gilpin is recommended for those libraries and individuals interested in international environmental law S R Moore Choice I thought Gilpin's work was excellent The coverage was thorough and extremely helpful without getting overly bogged down in unnecessary details I also felt that there was a very useful balance between national coverage as of European Union and United States statutes concepts and cases and international agreements I am certain that scholars political decision makers legal practitioners environmental activists and reference libraries will want to have Gilpin handy It may well become an indispensable reference work in environmental law and policy Thomas S Ulen University of Illinois US This new dictionary makes an important and innovative contribution to the reference literature on the environment International in scope it provides up to date entries on macro and micro issues in environmental law in both developed and developing countries Written by an author with both practical experience in the field and six previous dictionaries to his name this book adopts non technical language to improve access to key topics in environmental law It combines the use of case studies best practice models straightforward definitions and clear explanatory boxes This dictionary will be invaluable to everyone involved with environmental law including students of law as well as those in engineering and the social sciences It will also provide essential reference for all official national and international agencies environmental protection groups and NGOs plus environment and planning departments at every level

Energy and the Quality of Life Clifford A. Hooker, Robert Macdonald, Robert van Hulst, Peter Victor, 1981-12-15 As the supply cost crunch tightens issues related to energy become increasingly compelling This is a guide for the general public to the fossil fuel crisis facing Canada and Ontario in particular It is also about other long term matters of greater importance the economic socio political and cultural consequences of the choices which now have to be made primarily by governments The authors argue that energy policy is social policy Therefore our ideas about the kind of society we want must be a governing consideration in working out a policy to take Canada through the energy crisis The four writers bring to bear on the problem the perspectives of engineering philosophy environmental studies and economics The result is a balanced guide for the continuing debate on the adaptation of society to the imperatives of energy

Nuclear Energy and Nuclear Weapon Proliferation Stockholm International Peace Research Institute, 2020-11-19 In mid 1980 a second conference for the review of the Non Proliferation Treaty NPT would take place in Geneva Given the importance of preventing or at least slowing down nuclear weapon proliferation this conference would be a crucial event in the field of arms control and disarmament For many countries the technical and economic barriers to proliferation had disappeared and the only remaining barriers were political In an attempt to contribute to the discussions at the NPT Review Conference SIPRI assembled a group of experts from a number of countries to discuss the technical aspects of the control of fissionable materials in non military applications The meeting took place in Stockholm 12-16 October 1978 Originally published in 1979 this book on nuclear energy and nuclear

weapon proliferation contains the papers presented at the symposium and reflects the discussions at the meeting **The ANZUS Crisis, Nuclear Visiting and Deterrence** Michael Pugh, 1989 The development of nuclear weapons has been a critical problem for the NATO alliance In the Pacific a region of increasing strategic interest for the United States and Soviet Union nuclear weapons have been an environmental concern since the bombing of Hiroshima and Nagasaki Opposition to nuclear tests has now been taken a step further with the creation of a South Pacific Nuclear Free Zone and the decision by a New Zealand Government to ban port visits by vessels believed to be carrying nuclear weapons New Zealand's proposal to back its policy with legislation had been seen by the Reagan and Thatcher administrations as a threat to the principle of neither confirm nor deny the presence of nuclear weapons on vessels This 1989 study examines the questions of principle at issue the evolution of the ANZUS crisis its implications for the Western alliance structure as a whole and the degree to which the nuclear free virus in the South Pacific might be catching *Plutonium, Power, and Politics* Gene I. Rochlin, 2024-06-14 In the early 1970s the major industrial states were preparing to shift to nuclear fission as their principal source of electrical power But that change has not occurred In part this is due to a growing public recognition that techniques and institutions for management of spent nuclear fuel separated plutonium and long lived radioactive wastes are not yet fully developed The consequent pressures for resolution have spurred a series of often ill defined and sometimes contradictory attempts to promote international cooperation and control of hazardous activities How are these varied suggestions to be compared and evaluated By what criteria can plans be selected that are likely to be both effective and negotiable In this study Gene I Rochlin physicist and social scientist explores the technical political and institutional aspects of international nuclear export and fuel cycle policies He categorizes existing proposals and suggests way to develop new ones that better promote both national and international goals Dr Rochlin argues neither for nor against the use of nuclear power or plutonium fuels Instead he addresses the question of how international arrangements could be reached that might jointly satisfy the objective of the several key nations yet not be too difficult to negotiate He concludes that a major fault has been the tendency to improvise arrangements for specific technical or industrial operations As a result overall social and political goals have become the bargaining points for compromise Yet attempts to simultaneously resolve all problems are unlikely to prove fruitful Dr Rochlin suggests instead the formation of institutions organized around more limited social political and technical objectives even at the expense of excluding some nations or omitting some aspects of the nuclear fuel cycle Only by so doing he argues can immediate agreements be reached that preserve the potential for more comprehensive future arrangements without sacrificing industrial environmental or nonproliferation goals This important book will be of interest to scientists social scientists government officials and others concerned with the problems of plutonium management and nuclear wastes This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices

Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979 **Australia's Nuclear Policy** Michael Clarke,Stephan Frühling,2016-03-03 Australia s Nuclear Policy Reconciling Strategic Economic and Normative Interests critically re evaluates Australia s engagement with nuclear weapons nuclear power and the nuclear fuel cycle since the dawn of the nuclear age The authors develop a holistic conception of nuclear policy that extends across the three distinct but related spheres strategic economic and normative that have arisen from the basic dual use dilemma of nuclear technology Existing scholarship on Australia s nuclear policy has generally grappled with each of these spheres in isolation In a fresh evaluation of the field the authors investigate the broader aims of Australian nuclear policy and detail how successive Australian governments have engaged with nuclear issues since 1945 Through its holistic approach the book demonstrates the logic of seemingly conflicting policy positions at the heart of Australian nuclear policy including simultaneous reliance on US extended deterrence and the pursuit of nuclear disarmament Such apparent contradictions highlight the complex relationships between different ends and means of nuclear policy How successive Australian governments of different political shades have attempted to reconcile these in their nuclear policy over time is a central part of the history and future of Australia s engagement with the nuclear fuel cycle **History of the Australian Environment Movement** Drew Hutton,Libby Connors,1999-04-13 This book presents a history of the value of the Australian environment and the struggles to protect it
