## **Ranking Wishes:**

Ranking the Wishes Carl Dennis, 1997-06-01 In his seventh book Carl Dennis explores the ways in which our wishes those in our power to fulfill at any moment and those that have no chance of ever being realized define who we are While some of the poems view wishing as a failure to do justice to the world we have others regard it as a recognition that no present however rich can satisfy the imagination and suggest that one of the functions of poetry is to keep significant wishes alive In showing with moving clarity how wishes are essential to giving shape and direction to the moment these poems make use of a rich variety of genres elegy advice meditation warning consolation and prophecy

**Philosophy of Happiness** Martin Janello, 2014-10-23 Happiness We spend our life and all our efforts in its pursuit Yet do we really know what it is and how it occurs Are we secure in how to achieve and maintain it Are we certain that we are maximizing our potential to obtain it Our answers to these questions may not be as firm as we would like them to be The principles and strategies we produce or receive from others may not provide the happiness they promise or we desire We may be able to blame interference or seemingly unchangeable circumstances as causes for this shortfall But we may also sense that our lack of insight arrests our happiness at levels short of its potential We are searching often not even knowing what we are looking for This book investigates in a thorough manner what happiness is and how we might achieve happiness It is written as a theoretical and practical guide that does not require prior philosophical training Striving to cover all facets of human pursuits of happiness its philosophical considerations include topics of law economics political science sociology history anthropology psychology biology and physics Its inclusive examination reveals happiness as an intensely individual phenomenon as well as a systematic force that shapes human destiny and matters beyond up to a cosmic scale The book illuminates these subjective and objective functions of happiness Its insights about the nature of happiness may help us to understand the general subject matters of our search as well as the general terrain and rules by which we must abide in our pursuit of happiness However it does not presume to know what specific objectives and pursuits will make us happy Rather it develops describes and encourages us to discover tools to find understand and define our personal happiness and to pursue the implementation of this vision with optimized preparedness Its objective is not to indoctrinate but to empower us The book proposes that humans are generally endowed with all internal constituents and mechanisms to develop their happiness to its fullest possible extent Unless our faculties are pathologically impeded we might only have to become aware of these inherent forces to actuate them Improving our happiness seems to be a function of comprehensively revealing our concept of happiness and permitting it to take its natural place The mission of the book is to assist in this process Finding what makes us happy requires that we achieve knowledge of who we are and of what we want It requires us to be mindful of our wishes our needs our personality Once we understand our motivations we must arrange and implement them to their best effect in relation to one another our capacities other humans and our nonhuman environment The book supports us in gaining these insights and in the resulting

tasks The book further examines how much happiness we can expect to obtain even under the best circumstances It describes external and internal constraints that threaten our achievements But it also shows perspectives that may enable us to conquer limitations Thus we may not only gain clarity about our happiness but also confidence in its pursuit Visit the book website with the same name to learn more
