Corpse Encounters Jacqueline Elam, Chase Pielak, 2018-06-13 This book takes a critical glance at the ways in which we attend to the corpse tracing a trajectory from encounter toward considering options for disposal veneered mortuary internment green burial and its attendant rot cremation and alkaline hydrolysis donation and display and ecological burial Through tracing the possible futures of the dead that haunt the living through both the stories that we tell and physical manifestations following the end of life we expose the workings of aesthetics that shape corpses as well as the ways in which corpses spill over resisting aestheticization This book creates a space for ritualized practices surrounding death corpse disposal corpse aesthetics that shape both practices attendant upon and representations of the corpse and literary figural and cultural representations that deploy these practices to tell a story about dead bodies about their separation from the living about their disposability and ultimately about the living who survive the dead if only for a while There is an aesthetics of erasure persistently at work on the dead body It must be quickly hidden from sight to shield us from the certain trauma of our own demise or so the unspoken argument goes Experts scientists forensic specialists death care professionals and law enforcement are the only ones qualified to view the dead for any extended period of time The rest of us with only brief doses inoculate ourselves from the materiality of death in complex and highly ritualized ceremonies Beyond participating in the project of restoring our sense of finitude we try to make sense of the untouchable unviewable haunting and taboo presence of the corpse itself

Reading Women Heidi Brayman Hackel, Catherine E. Kelly, 2011-08-02 In

1500 as many as 99 out of 100 English women may have been illiterate and girls of all social backgrounds were the objects of purposeful efforts to restrict their access to full literacy Three centuries later more than half of all English and Anglo American women could read and the female reader was emerging as a cultural ideal and a market force While scholars have written extensively about women's reading in the nineteenth and twentieth centuries and about women's writing in the early modern period they have not attended sufficiently to the critical transformation that took place as female readers and their reading assumed significant cultural and economic power Reading Women brings into conversation the latest scholarship by early modernists and early Americanists on the role of gender in the production and consumption of texts during this expansion of female readership Drawing together historians and literary scholars the essays share a concern with local specificity and material culture Removing women from the historically inaccurate frame of exclusively solitary silent reading the authors collectively return their subjects to the activities that so often coincided with reading shopping sewing talking writing performing and collecting With chapters on samplers storytelling testimony and translation the volume expands notions of reading and literacy and it insists upon a rich and varied narrative that crosses disciplinary boundaries and national borders

Wonderful Things Jason Thompson, 2015 The discovery of ancient Egypt and the development of Egyptology are momentous events in intellectual and cultural history The history of Egyptology is the story of the people famous and obscure who constructed the picture of ancient Egypt that we have today recovered the Egyptian past while inventing it anew and made a lost civilization comprehensible to generations of enchanted readers and viewers thousands of years later

Writing about Archaeology Graham Connah, 2010-03-08 In this book Graham Connah offers an overview of archaeological authorship its diversity its challenges and its methodology Based

on his own experiences he presents his personal views about the task of writing about archaeology The book is not intended to be a technical manual Instead Connah aims to encourage archaeologists who write about their subject to think about the process of writing He writes with the beginning author in mind but the book will be of interest to all archaeologists who plan to publish their work Connah s overall premise is that those who write about archaeology need to be less concerned with content and more concerned with how they present it It is not enough to be a good archaeologist One must also become a good writer and be able to communicate effectively Archaeology he argues is above all a literary discipline Handbook to Life in Ancient Egypt Ann Rosalie David,1999 Explores the lifestyles of the ancient Egyptians including economy and industry foreign trade and transportation architecture and more Ancient Egypt Britannica Educational Publishing,2010-04-01 Home to some of the most remarkable feats of engineering as well as awe inspiring natural vistas ancient Egypt was a land of great promise fulfilled Its pyramids writing systems and art all predate the Islamic conquest and are symbols of the civilization s vitality This volume invites readers to indulge in the splendors of ancient Egyptian culture and discover the traditions that have fired imaginations for generations A detailed appendix profiles important sites throughout Egypt many of which still contain remnants and artifacts that illustrate the import of this extraordinary civilization **Pharaoh Seti I** Nicky Nielsen,2018-09-30 Pharaoh Seti I ruled Egypt for only 11 years 1290 1279 BC but his reign marked a revival of Egyptian military and economic power as well as cultural and religious life Seti was born the son of a military officer in northern Egypt far from the halls of power in Memphis and Thebes However when the last king of the 18th Dynasty Horemheb died without an heir Seti s father was named king He ruled for only two years before dying of old age leaving Seti in charge of an ailing superpower Seti set about rebuilding Egypt after a century of dynastic struggles and religious unrest He reasserted Egypt s might with a series of campaigns across the Levant Libya and Nubia He despatched expeditions to mine for copper gold and quarry for stone in the deserts laying the foundations for one of the most ambitious building projects of any Egyptian Pharaoh and his actions allowed his son Ramesses the Great to rule in relative peace and stability for 69 years building on the legacy of his father *And Yet, We Still Stand* Millicent Thomas, PhD,2016-06-06 And yet We still stand is the second book in the Move Mountain African American single parent series Book two takes you on a political social and economic journey from Washington DC to Walmart from the top of the heap to the bottom of the pit and from a strategic agenda of disenfranchisement to its execution in the political economic and social arenas We move from impersonal to the personal and from the macro to the micro aspects of the impact on families and children As the reader travels through the pages we examine the shadow side of human nature from a political perspective The descending and ascending order of events that impact the lives of African Americans is exacerbated among single parents Hypotheses reasons and justifications are put forth with relation to the why and how target groups are treated We move back in time before the days of the Mayflower to answer the why inquiry and move forward stopping to visit the infamous communication of Willie Lynch to

answer the how Because education is vital to African Americans we take a critical look at public education on all levels and ask Are the strategies and techniques used to educate our children by design Or are those who develop educational materials using a system of miss education and or selective education In our journey we stop to revisit the workplace experiences of fifteen African American female single parents from the later 20th century and ask when is a change a change The third section proposes the ultimate recommendation one that is not popular in many circles yet is extremely powerful This is a must read for all

Curiosity and the Aesthetics of Travel-Writing, 1770-1840 Nigel Leask, 2002-01-10 The decades between 1770 and 1840 are rich in exotic accounts of the ruin strewn landscapes of Ethiopia Egypt India and Mexico Yet it is a field which has been neglected by scholars and which unjustifiably remains outside the literary canon In this pioneering book Nigel Leask studies the Romantic obsession with these antique lands drawing generously on a wide range of eighteenth and nineteenth century travel books as well as on recent scholarship in literature history geography and anthropology Viewing the texts primarily as literary works rather than transparent adventure stories or documentary sources he sets out to challenge the tendency in modern academic work to overemphasize the authoritative character of colonial discourse Instead he addresses the relationship between narrative aesthetics and colonialism through the unstable discourse of antiquarianism exploring the effects of problems of creditworthiness and the nebulous epistemological claims of curiosity a leitmotif of the accounts studied here on the contemporary status of travel writing Attentive to the often divergent idioms of elite and popular exoticism *Curiosity and the Aesthetics of Travel Writing* plots the transformation of the travelogue through the period as the baroque particularism of curiosity was challenged by picturesque aesthetics systematic geographical narrative and the emergence of a transcendental self axiomatic to Romantic culture In so doing it offers an important reformulation of the relations between literature aesthetics and empire in the late Enlightenment and Romantic periods

Atlantis and the Ten Plagues of Egypt Graham Phillips, 2003-07-23 Shows how a desecrated tomb in the Valley of the Kings holds the key to the true history of the destruction of Atlantis Reveals that Tomb 55 in the Valley of the Kings was designed not to keep intruders out but to trap something inside Provides forensic evidence proving that the mask believed to be the face of Tutankhamun is actually that of his elder brother Smenkhkare In *Atlantis and the Ten Plagues of Egypt* Graham Phillips explores the excavation of a mysterious and ritually desecrated tomb in the Valley of the Kings Tomb 55 which he contends holds the key to the true history of the destruction of Atlantis Unlike other Egyptian tombs designed to keep intruders out Tomb 55 was constructed to keep something imprisoned within specifically Smenkhkare the older brother

of Tutankhamun who was deemed responsible for the ten plagues in Egyptian history to prevent such tragedies from ever happening again. The forensic findings from this tomb coupled with compelling new evidence from the polar ice caps provide sensational evidence that the parting of the Red Sea, the deaths of the firstborn and the other plagues that afflicted Egypt were all actual historical events. Core samples from the polar ice caps indicate that a gigantic volcanic eruption took place in the eastern Mediterranean around the time of Amonhotep's reign. Other research suggests this to have been the time of the eruption that destroyed the Greek island of Thera, one of the likely locations of Atlantis, and that the subsequent cataclysm may explain the unusual lack of resistance to the new religion installed by Amonhotep's son Akhenaten when he took power several years later.
