network design to the complex distributed systems shaping today's digital landscape. It delves into the fundamental terminology, core models, and critical performance metrics, offering valuable context for understanding traffic patterns, application workloads, and their profound implications on scalable network design. The treatise presents a rigorous analysis of algorithmic and architectural solutions, ranging from classic round robin and least connections methods to cutting-edge approaches like geo-aware routing and adaptive machine learning-driven strategies. Readers will discover essential distinctions between hardware and software deployments, the intricacies of hybrid and edge architectures, and the vital importance of high availability, redundancy, and control plane/data plane separation. In-depth coverage extends to practical application layer topics such as Layer 4 and Layer 7, balancing session affinity, protocol-specific nuances, and advanced routing capabilities like SSL offloading and header manipulation. Equipping professionals and enthusiasts alike for today's multi-cloud and cloud-native environments, this book also addresses advanced traffic management, sophisticated security postures, observability, and performance tuning. It surveys emerging trends in AI-driven optimization, 5G edge deployments, quantum-safe networking, and zero-trust integrations, culminating in a clear vision for the next generation of self-adaptive, resilient load balancing. *Load Balancer Technologies and Architectures* is an indispensable resource for architects, engineers, and technology leaders seeking authoritative insight and future-proof strategies in the art and science of traffic distribution.

Joint external evaluation of IHR core capacities of Zambia World Health Organization, 2025-05-06. The second Joint External Evaluation (JEE) convened by Zambia National Public Health Institute (ZNPHI) assessed Zambia's compliance with the International Health Regulations (IHR) core capacities using the WHO IHR Joint External Evaluation tool. The evaluation was conducted in October 2023 by a team of external experts with international experience in diverse technical areas, engaging with technical experts from Zambia's government bodies, academic institutions, and development partners. It involved discussions across all technical areas stipulated in the JEE tool, site visits at national and sub-national levels, and resulted in collaborative development of priority actions. The comprehensive report provides technical area scores, strengths, challenges, and specific recommendations, with an emphasis on identified cross-cutting themes that require immediate attention for enhanced public health security.
