Rarity Or Frequency Of The Mystic States:

Rarity Or Frequency of the Mystic States R. P. Aug. Poulan, 2005-12 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work

The Graces of Interior Prayer (Des Grâces D'oraison) Augustin Poulain, 1921 **The Graces of Interior Prayer** Augustin Poulain, 1912 **Mystical Phenomena Compared with Their Human and Diabolical Counterfeits** Albert Farges, 1926 John of the Cross and the Cognitive Value of Mysticism S. Payne, 2012-12-06 Among Anglo American philosophers interest in mysticism has typically been limited to the question of whether or not mystical and religious experiences provide evidence for or knowledge of the existence and nature of God Most authors conclude that they do not because such experiences lack certain qualities needed in order to be counted as cognitive In this study I examine some current philosophical opinions about mysticism and objections to its epistemic significance in the context of a detailed study of the writings of a single mystical author the Spanish Carmelite Saint John of the Cross 1542-1591 I argue that from his works one can draw a coherent theory of what takes place in the Christian mystical life and will indicate how acceptance of this theory might be defended as rational through a type of inference often referred to as the Argument to the Best Explanation In this way I hope to show that mysticism still has a significant bearing on the justification of religious faith even if it cannot be used to prove the existence of God The nature and advantages of my own somewhat unusual approach to mysticism can perhaps best be explained by contrasting it with the way other authors have dealt with the subject One of the most striking developments in recent decades has been the growing fascination with mysticism meditation and the experiential aspects of religion

The Psychology of Religious Mysticism James H. Leuba, 2013-11-05 First Published in 1999 This is Volume III of six of a series on the Psychology of Religion Written around 1925 this book is a psychological study of human nature It includes a philosophical chapter and also one in which are set forth the practical consequences to religion of some of its conclusions But whatever may be the importance of these two chapters the book is to be judged primarily as a psychological study of aspects of human nature conspicuous in mystical religion **The Psychology of Religious Mysticism** James Henry Leuba, 1925

John of the Cross and the Cognitive Value of Mysticism Steven Payne, 1990-07-31 This book is a significant contribution to the literature on mysticism and the epistemology thereof It is recommended to all those interested in the mystics and in the question of the cognitive value of mysticism Review of Metaphysics March 1992 Rational Mysticism John Horgan, 2004-03-22 The author of The End of Science chronicles the most advanced research into such experiences as prayer fasting and trances in this great read The Washington Post How do trances visions prayer satori and other mystical experiences work What induces and defines them Is there a scientific explanation for religious mysteries and transcendent

meditation John Horgan investigates a wide range of fields chemistry neuroscience psychology anthropology theology and more to narrow the gap between reason and mystical phenomena As both a seeker and an award winning journalist Horgan consulted a wide range of experts including theologian Huston Smith spiritual heir to Joseph Campbell Andrew Newberg the scientist whose quest for the God module was the focus of a Newsweek cover story Ken Wilber prominent transpersonal psychologist Alexander Shulgin legendary psychedelic drug chemist and Susan Blackmore Oxford educated psychologist parapsychology debunker and Zen practitioner Horgan explores the striking similarities between mystical technologies like sensory deprivation prayer fasting trance dancing meditation and drug trips He participates in experiments that seek the neurological underpinnings of mystical experiences And finally he recounts his own search for enlightenment adventurous poignant and sometimes surprisingly comic Horgan s conclusions resonate with the controversial climax of *The End of Science* because as he argues the most enlightened mystics and the most enlightened scientists end up in the same place confronting the imponderable depth of the universe *Studies in Religious Mysticism* Santosh Thomas,2005 This Book Is An Introductory Study Of Mysticism In The Christian Religion It Should Be Suitable For Both General Readers And College Undergraduates It Provides Both A Theory Of Mysticism And Surveys Of Its Main Contours In Buddhism And Traditional Religious Cultures It Also Suggests How Readers May Understand And Appreciate What Mysticism Implies For Their Own Lives **The Psychology of Religion, Fourth Edition** Ralph W. Hood, Jr.,Peter C. Hill,Bernard Spilka,2009-07-15 Scholarly and comprehensive yet accessible this state of the science work is widely regarded as the definitive graduate level psychology of religion text The authors synthesize classic and contemporary empirical research on numerous different religious groups Coverage includes religious thought belief and behavior across the lifespan links between religion and biology the forms and meaning of religious experience the social psychology of religious organizations and connections to morality coping mental health and psychopathology Every chapter features thought provoking quotations and examples that bring key concepts to life New to This Edition Revised and updated with the latest theories methods and empirical findings Many new research examples Restructured with fewer chapters for better fit with a typical semester More attention to the differences between religion and spirituality Covers emerging topics genetics and neurobiology positive psychology atheism and more **The Psychology of the Mystics** Joseph Maréchal,2012-06-11 This landmark survey ranges from contrasts of empirical science and religious psychology to examinations of the distinctive features of Christian mysticism and the Islamic concept of mystical grace **Lesbian Ethics** ,1987 **Meditation** Deane H. States of Consciousness Andrzej Kokoszka, 2007-10-25 Consciousness has always been a particularly elusive concept and one vigorously argued in the scientific community This new volume takes on the task of defining normal and altered consciousness in their most relevant clinical terms In States of Consciousness Andrzej Kokoszka expands on the pioneering work of J H Jackson offering contemporary models for studying consciousness as it applies to both pathology and normal altered states e g relaxation sleep meditation and hypnosis He makes clear distinctions between the neuroscientific and psychiatric components of

consciousness at the same time his theories are rooted firmly in the biopsychosocial approach Highlights of the coverage
Historical overview of studies of consciousness and its altered states Evolutionary dynamic model of consciousness and
information processing based on the structure and principles of cell behavior Comparison of altered states of consciousness
in healthy persons and patients with schizophrenia New perspectives on the role of consciousness in pathology Case
illustration of altered states in a patient with Posttraumatic Stress Disorder integrating neurobiological cognitive behavioral
and psychodynamic data Applications of the model in clinical practice States of Consciousness lends itself to theoretical and
practical research and classroom use It is relevant to a range of scientists and practitioners in cognition clinical psychology
social psychology and neuropsychology The book s scope and the author s attention to detail make it a work of great
versatility much like consciousness itself **Mysticism** Group for the Advancement of Psychiatry. Committee on Psychiatry
and Religion,1976 They Flew Carlos M. N. Eire,2023-08-29 An award winning historian s examination of impossible
events at the dawn of modernity and of their enduring significance Accounts of seemingly impossible phenomena abounded
in the early modern era tales of levitation bilocation and witchcraft even as skepticism atheism and empirical science were
starting to supplant religious belief in the paranormal In this book Carlos Eire explores how a culture increasingly devoted to
scientific thinking grappled with events deemed impossible by its leading intellectuals Eire observes how levitating saints
and flying witches were as essential a component of early modern life as the religious turmoil of the age and as much a part
of history as Newton s scientific discoveries Relying on an array of firsthand accounts and focusing on exceptionally
impossible cases involving levitation bilocation witchcraft and demonic possession Eire challenges established assumptions
about the redrawing of boundaries between the natural and supernatural that marked the transition to modernity Using as
his case studies stories about St Teresa of Avila St Joseph of Cupertino the Venerable Mar a de greda and three disgraced
nuns Eire challenges readers to imagine a world animated by a different understanding of reality and of the supernatural s
relationship with the natural world The questions he explores such as why and how impossibility is determined by cultural
contexts and whether there is more to reality than meets the eye or can be observed by science have resonance and lessons
for our time **Listening** ,1974
