Rational Animal And Other Philosophical Essays On The Nature Of Man:

A Rational Animal and Other Philosophical Essays on the Nature of Man Antony Flew, 1978 These philosophical essays are related by a concern to develop and defend an Aristotelian view that we are both essentially and entirely creatures of mortal flesh and blood and uniquely rational animals

On the Nature of Philosophy and Other Philosophical Essays Nicholas Rescher, 2013-05-02 This book continues Rescher's longstanding practice of publishing groups of philosophical essays. Notwithstanding their thematic diversity, these discussions exhibit a uniformity of method in addressing philosophical issues via a mixture of historical contextualization, analytical scrutiny, and common-sensical concern. Their interest, such as it is, lies not just in what they do but in how they do it.

The Epistemological Skyhook Jim Slagle, 2016-05-20 Throughout philosophical history, there has been a recurring argument to the effect that determinism, naturalism, or both are self-referentially incoherent. By accepting determinism or naturalism, one allegedly acquires a reason to reject determinism or naturalism. *The Epistemological Skyhook* brings together for the first time the principal expressions of this argument, focusing primarily on the last 150 years. This book addresses the versions of this argument as presented by Arthur Lovejoy, A. E. Taylor, Kurt G. del C. S. Lewis, Norman Malcolm, Karl Popper, J. R. Lucas, William Hasker, Thomas Nagel, Alvin Plantinga, and others, along with the objections presented by their many detractors. It concludes by presenting a new version of the argument that synthesizes the best aspects of the others while also rendering the argument immune to some of the most significant objections made to it.

Evolutionary Epistemology and its Implications for Humankind Franz M. Wuketits, 1990-01-01 This book aims to outline the scientific biological foundations of evolutionary epistemology and to discuss its implications for humankind. Wuketits covers all aspects of evolutionary epistemology, including its empirical foundations and its philosophical and anthropological consequences, providing an accessible introduction with a minimum of jargon.

The Boundaries of Humanity James J. Sheehan, Morton Sosna, 2024-03-29 To the age-old debate over what it means to be human, the relatively new fields of sociobiology and artificial intelligence bring new, if not necessarily compatible, insights. What have these two fields in common? Have they affected the way we define humanity? These and other timely questions are addressed with colorful individuality by the authors of *The Boundaries of Humanity*. Leading researchers in both sociobiology and artificial intelligence combine their reflections with those of philosophers, historians, and social scientists, while the editors explore the historical and contemporary contexts of the debate in their introductions. The implications of their individual arguments and the often heated controversies generated by biological determinism or by mechanical models of mind go to the heart of contemporary scientific, philosophical, and humanistic studies.

Dictionary Of Modern American Philosophers John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought Contemporary Perspectives in Philosophy and Methodology of Science Wenceslao J. González, 2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place *The Harvard Classics: Literary and philosophical essays, French, German and Italian* Charles William Eliot, 1910 V 49 Epic and saga

Crime, Punishment and Disease in a Relativistic Universe Antony Flew, 2018-02-06 In *Crime Punishment and Disease* Antony Flew makes clear both the meaning and the implications carried by the application of the expression mental disease He aims to discourage its use in conditions that provide the victims of such diseases with an excuse for failing to perform what would have been their imperative duties had they enjoyed good mental health Flew attacks the gross over extensions of the notion of mental disease on both sides of the Atlantic He defends human dignity and responsibility against the suggestion that we are all or most of us sick sick sick In particular he challenges the paternalist pretensions of people who claim a right to control and manipulate others because they are allegedly sick and consequently not responsible for what they do In a typical ordinary disease Flew notes it is the patient who complains of the disease rather than someone else who complains about the patient But those who claim that some crime or all crime is symptomatic of mental disease and those who identify

disorders such as attention deficit hyperactivity disorder ADHD as conditions requiring psychiatric attention are taking the disfavored behavior rather than the distress of their patients as the warrant for supposedly medical interventions They should instead first consider how what they propose to call mental disease does and does not resemble syphilis measles and other communicable diseases Flew sees his work as complementary to Thomas Szasz's He applies a philosophical perspective to problems Szasz discusses as a psychiatrist This work will be of particular interest to students of philosophy and politics in that it relates modern discussion of mental illness to the Plato of *The Republic* Flew also takes note in this context of Samuel Butler's *Erewhon* This work will be of direct relevance to criminologists as well as those interested in social welfare
