Wong, Jonathan Bach**

Revolution Resistance And Reform In Village China:

Revolution, Resistance, and Reform in Village China Edward Friedman, Paul G. Pickowicz, Mark Selden, 2005-01-01 Drawing on nearly 30 years of field and documentary research in rural North China this book explores the contested relationship between village and state since the 1960 s The authors bring the countryside to life through personal and poignant accounts of villagers across three generations of social upheaval China's Revolutions and Intergenerational Relations Martin Whyte, 2020-08-06 China s Revolutions and Intergenerational Relations counters the widely accepted notion that traditional family patterns are weakened by forces such as economic development and social revolutions China has experienced wrenching changes on both the economic and the political fronts yet from the evidence presented here the tradition of filial respect and support for aging parents remains alive and well Using collaborative surveys carried out in 1994 in the middle sized industrial city of Baoding and comparative data from urban Taiwan the authors examine issues shaping the relationships between adult Chinese children and their elderly parents The continued vitality of intergenerational support and filial obligations in these samples is not simply an instance of strong Confucian tradition trumping powerful forces of change Instead and somewhat paradoxically the continued strength of filial obligations can be attributed largely to the institutions of Chinese socialism forged in the era of Mao Zedong With socialist institutions now under assault in the People s Republic of China the future of intergenerational relations in the twenty first century is once again uncertain **The Transformation of Rural China** Jonathan Unger, 2016-09-16 During the past quarter century Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day A leading specialist on rural China Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives This is a story of unexpected continuities amidst enormous change Unger describes how rural administrations retain Mao era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan to get rich is glorious A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones Another based on five months of travel by jeep into impoverished villages in the interior describes the dilemmas of under development still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods Women and China's Revolutions Gail Hershatler, 2018-09-04 If we place women at the center of our account of China s last two centuries how does this change our understanding of what happened This deeply knowledgeable book illuminates the places where the Big History of recognizable events intersects with the daily lives of ordinary people using gender as its analytic lens Leading scholar Gail Hershatler asks how these events affected women in particular and

how women affected the course of these events For instance did women have a 1911 revolution A socialist revolution If so what did those revolutions look like Which women had them Hershatter uses two key themes to frame her analysis The first is the importance of women s visible and invisible labor The labor of women in domestic and public spaces shaped China s move from empire to republic to socialist nation to rising capitalist power The second is the symbolic work performed by gender itself What women should do and be was a constant topic of debate during China s transformation from empire to weak state to partially occupied territory to nascent socialist republic to reform era powerhouse What sorts of concerns did people express through the language of gender How did that language work and why was it so powerful Drawing on decades of Hershatter s groundbreaking scholarship and mastery of a range of literatures this beautifully written book will be essential reading for all students of China s modern history

The Emergence of Organizations and Markets John F. Padgett, Walter W. Powell, 2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty Where do new alternatives new organizational forms and new types of people come from Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses John Padgett and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks They demonstrate that novelty arises from spillovers across intertwined networks in different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community

Learning from Shenzhen Mary Ann O'Donnell, Winnie Wong, Jonathan Bach, 2017-02-07 This multidisciplinary volume the first of its kind presents an account of China s contemporary transformation via one of its most important yet overlooked cities Shenzhen located just north of Hong Kong In recent decades Shenzhen has transformed from an experimental site for economic reform into a dominant city at the crossroads of the global economy The first of China s special economic zones Shenzhen is today a UNESCO City of Design and the hub of China s emerging technology industries Bringing China studies into dialogue with urban studies the contributors explore how the post Mao Chinese appropriation of capitalist logic led to a dramatic remodeling of the Chinese city and collective life in China today These essays show how urban villages and informal institutions enabled social transformation through cases of public health labor architecture

gender politics education and more Offering scholars and general readers alike an unprecedented look at one of the world's most dynamic metropolises this collective history uses the urban case study to explore critical problems and possibilities relevant for modern day China and beyond *State-Society Relations and Confucian Revivalism in Contemporary China* Qin Pang,2018-05-25 This book is a study of the causes of the Confucian revival and the party state's response in China today It concentrates on the interactions between state and society and the implications for the Chinese state's control over society or in other words its survival over a rapidly modernizing society The book explores the answers to questions such as Why has Confucianism suddenly gathered great momentum in contemporary Chinese society What is the role of the Chinese state in its rise Is the state really the orchestrator of the Confucian revival as has been widely assumed This book will be of interest to think tank and policy researchers sinologists and those with an interest in Chinese society Cutting the Mass Line Andrea E. Pia,2024-07-02 This book is aimed at rethinking social scientific approaches to collective action by exploring China's ongoing water crisis from the vantage point of Huize County a water stressed ecologically damaged multi ethnic area of rural Yunnan Province **Mao's Third Front** Covell F. Meyskens,2020-05-14 An examination of how economic development and everyday life intersected with the temperature of Cold War geopolitics in Mao's China **Disenfranchised** Joel Andreas,2019 In the decades following World War II factories in many countries not only provided secure employment and a range of economic entitlements but also recognized workers as legitimate stakeholders enabling them to claim rights to participate in decision making and hold factory leaders accountable In recent decades as employment has become more precarious these attributes of industrial citizenship have been eroded and workers have increasingly been reduced to hired hands As Joel Andreas shows in *Disenfranchised* no country has experienced these changes as dramatically as China Drawing on a decade of field research including interviews with both factory workers and managers Andreas traces the changing political status of workers inside Chinese factories from 1949 to the present carefully analyzing how much power they have actually had to shape their working conditions

Delve into the emotional tapestry woven by Emotional Journey with in Dive into the Emotion of **Revolution Resistance And Reform In Village China** . This ebook, available for download in a PDF format (PDF Size: *), is more than just words on a page; it's a journey of connection and profound emotion. Immerse yourself in narratives that tug at your heartstrings. Download now to experience the pulse of each page and let your emotions run wild.
