Roger So Far CORPS OF ROYAL SIGNALS., 2020-05 Since 1920 the Royal Corps of Signals has provided the British Army's central nervous system enabling orders to be delivered and information to be exchanged principally at the higher levels of command It has been crucial in supporting the vast majority of military land based operations after the First World War Its importance is growing because conducting successful operations is becoming increasingly reliant upon being able to operate in a congested and contested electronic battlespace ROGER SO FAR does not aim to tell the full story of the Royal Corps of Signals since much of the Corps work now and in the past is secret Instead the book is a celebration of the Corps achievements and the ability of its soldiers to use innovation and improvisation to deliver results beyond all reasonable expectations As well as acting as an historical record including reminiscences covering several aspects of life within the Corps during its first 100 years it seeks to stir memories and to inform those who are serving or have served in the Corps as well as to inform those who have not served and those who may be thinking of doing so

Godfrey,2013-05-09 Command Control Communications and Intelligence form the backbone of the Army s operating system But while much attention has been given in the literature to the other three elements Communications in the British Army during World War II have been widely ignored This book rectifies the omission It shows that failures in front line communications contributed to several of the set backs suffered by the Army but also that ultimate victory was only achieved after a successful communications system was in place It explains how the outcome of the main campaigns in Europe and North Africa depended on communications how the system operated and how it evolved from a relatively primitive and inadequately supplied state at Dunkirk to a generally effective system at the time of the Rhine crossings Problems still occurred however for example at infantry platoon level and famously with paratrooper communications at Arnhem often simply due to the shortcomings of existing technology The book concludes that it is only very recently that advances in technology have allowed those problems to be solved **The British Expeditionary Force, 1939-40** E.
