## **Say No To Circumcision 40 Compelling Reasons:**

**Say No to Circumcision!** Thomas J. Ritter, George C. Denniston, 1996      **What Your Doctor May Not Tell You About(TM): Circumcision** Paul M. Fleiss, Frederick M. Hodges, 2002-09-01 This guide aims to explode the myths and misinformation about circumcision in an accessible easy to read format After describing the anatomy of the penis the book explains the procedure describes the risks associated and debunks the six most common reasons doctors will give when recommending it

**Male and Female Circumcision** George C. Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2007-08-27 Every year around the world 13 3 million boys and 2 million girls have part or all of their external sex organs cut off Doctors parents and politicians have been misled into thinking that these mutilations are beneficial necessary and harmless International respected experts in the fields of medicine science politics law ethics sociology anthropology history and religion present the latest research documentation and analysis of this world wide problem focusing on the ethical political and legal aspects of sexual mutilation the cost and burden to healthcare systems the latest medical research anatomical and function consequences religious and cultural aspects psychological aspects and the world wide campaign to end sexual mutilation

*Sexual Mutilations* George C. Denniston, Marilyn Fayre Milos, 2013-03-09 Sexual mutilation is a global problem that affects 15 3 million children and young adults annually In terms of gender 13 3 million boys and 2 million girls are involuntarily subjected to sexual mutilation every year While it is tempting to quantify and compare the amount of tissue removed from either gender no ethical justification can be made for removing any amount of flesh from the body of another person The violation of human rights implicit in sexual mutilation is identical for any gender The violation occurs with the first cut into another person s body Although mutilation is a strong term it precisely and accurately describes a condition denoting any disfigurement or injury by removal or destruction of any conspicuous or essential part of the body While such terms as circumcision and genital cutting are less threatening to our sensitivities they ultimately do a disservice by masking the fact of what is actually being done to babies and children Although the courageous example of the survivors of sexual mutilation indicates that humans can certainly live and even reproduce without all of their external sexual organs this biological phenomenon does not however justify subjecting a person to sexual mutilation The remarkable resilience of the human body is a testament to the importance nature places on reproduction rather than a vindication for surgical practices that compromise this function
