History of Design and Design Law Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson, 2022-04-22 For the first time this book provides an up to date history of product design and product design law covering 17 countries Japan Korea China Singapore the United Kingdom Germany France Italy the Nordic countries Denmark Finland Iceland Norway and Sweden Russia the United States Brazil

and Australia selected for their innovative or influential approach to design or design protection Each country is the subject of two chapters one on the history of design and the other on the history of design law authored by experts in design and intellectual property IP law This unique interdisciplinary approach explains why and how various national design protection systems that can include design copyright trade mark competition and civil laws developed making it an ideal book for students researchers and lawyers The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages and so is also recommended for policy and law makers as well as organizations that administer IP rights Topics include the subject matter of design protection procedural and substantive requirements design registration infringement and the overlap of design rights and other IP rights The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements key designers and iconic designs and the current state of design The chapters highlight the connected and often complementary relationship between the two histories not only for each country but at the regional and international level often as a result of government policies trade colonialism immigration and globalisation Design and design practice continue to become more global and evolve with developments in technology At the same time design laws are not internationally harmonized and continue to develop at the national level with a number of significant changes occurring in recent years This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it

this book reveals a lesser known history of cross cultural collaborations exhibition production and tensions between mainstream and indigenous design in Scandinavia Transnational Discourses in Nordic Design also provides an insight into some of the authors own design practices and reveals the challenges facing Nordic designers today *Making Design Theory* Johan Redstrom,2017-09-01 A new approach to theory development for practice driven research proposing that theory is something made in and through design Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms In this book Johan Redstr m offers a new approach to theory development in design research one that is driven by practice experimentation and making Redstr m does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making Redstr m proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional Redstr m describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs These are the building blocks for creating conceptual structures to support design Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science With his idea of transitional theory Redstr m departs from the traditional academic imperative to pick a side theory or practice art or science Doing so he opens up something like a design space for theory development within design research
