Scandinavian Misadventure The Campaign In Norway 194:

Hitler's Arctic War Chris Mann, Christer Jörgensen, 2003-03-13 A thorough and thought provoking study of Germany's campaign in Norway, Finland and the USSR during World War II. 110 photos, 6 maps. **Scandinavian Misadventure** Maurice Harvey, 2010-11-30 In April 1940 an uneasy pause following the blitzkrieg in Poland in 1939 settled over Europe. All the major protagonists were insufficiently prepared to engage in a major land battle on the Western Front during the winter of 1939-40 the RAF was unready to launch a strategic offensive on Germany and it was only at sea that the conflict was pursued with any conviction. Goaded by Winston Churchill the Allies contemplated severing the supply route of iron ore from Sweden to Germany via Narvik but for six months the governments in London and Paris debated incessantly but did nothing. The government in Oslo, clinging to Norway's neutralist principles, watched and waited. In the early hours of 9 April 1940 Hitler emphatically answered the question of where the war was to be fought, launching a sea and air attack on Norway and Denmark. The Allies responded promptly but although their intervention was ill prepared and inadequately supported it was studded with fierce military actions and individual acts of valour and fortitude. The author carefully sets the scene in all the countries directly involved in the conflict before describing the invasion itself and the two dramatic raids on Narvik. The description of the main land battle is followed by an analysis of the lessons to be learned from this calamitous episode in the Allied war effort, including showing how the naval losses the Germans suffered ensured Britain was safe from invasion and made the evacuation from Dunkirk possible. **Scandinavian Misadventure** Maurice Harvey, 1990 **The Campaign in Norway** Thomas K. Derry, 1953 **The Doomed Expedition** Jack Adams, 1989 *Campaign in Norway* J. R. M. Butler (editor), T. K. Derry (author), Thomas Kingston Derry, 2004 T. K. Derry's official account of the disastrous opening British campaign of the Second World War in April-May 1940 which led to the downfall of Neville Chamberlain and the elevation of Winston Churchill to the Premiership. Derry describes the rival British and German plans to occupy Norway, the source of vital raw materials. He shows how Hitler far from missing the bus in Chamberlain's contemptuous phrase, struck first, invading by air and sea and catching the British on the hop. Derry details the belated British response with amphibious operations and landings around Trondheim and Narvik in central and northern Norway. Despite losing half their destroyers to the Royal Navy, Germany's speedy occupation of the main population centres and the Luftwaffe's command of the air made her victory and a humiliating British withdrawal inevitable. The author is unsparing in his analysis of the command and intelligence failures behind Britain's first major military setback of the war, which had such far-reaching political consequences. Illustrated with 11 general and situation maps, 7 sketch maps and five photographs. **The Doomed Expedition** Jack Adams, 1990 **Norway 1940** Harry Plevy, 2017 Ostensibly fought for control of Swedish iron ore to Germany, the campaign made an important but largely overlooked contribution to the conduct of the Second World War. It convincingly proved the supremacy of air power in modern warfare and particularly the vulnerability of land and sea forces to sustained undefended air assault. It was the first

conflict in which one side the German used all three arms of their forces in integrated combined assault Blitzkrieg and in which parachute and glider borne troops were used to secure airfields and strategic targets The Allies Britain France Norway and Poland in contrast tried to conduct the Campaign on land with inadequate air support and virtually the sole use of infantrymen The book deals in an integrated and comprehensive manner with the strategic and political imperatives as well as operations in a complex and rapidly changing two month campaign While other books on the Campaign have tended to focus on a limited perspective such as naval operations or on the higher levels of political decision making without combatant or personal perspective this book makes much use of contemporary writings and eye witness accounts many previously unpublished of the people actually involved in the Campaign *The Norway Campaign and the Rise of Churchill 1940* Anthony Dix, 2014 While the campaign in Norway April to June 1940 was a depressing opening to active hostilities between Britain and Nazi Germany it led directly to Churchill's war leadership and The Coalition Both were to prove decisive in the long term This well researched work opens with a summary of the issues and personalities in British politics in the 1930s The consequences of appeasement and failure to re arm quickly became apparent in April 1940 The Royal Navy which had been the defense priority found itself seriously threatened by the Luftwaffe's control of the skies The economies inflicted on the Army were all too obvious when faced by the Wehrmacht Losses of men and equipment were serious and salutary The campaign itself is broken down into three phases the landings in support of the Norwegians the evacuation from Central Norway which led to Chamberlain's resignation and finally the campaign in the North which remained credible until the fall of France This book with its informed mix of politics and war fighting provides a balanced overview of the opening campaign of the Second World War and its consequences *Forcible Entry And The German Invasion Of Norway, 1940* Major Michael W. Richardson, 2015-11-06 The air sea land forcible entry of Norway in 1940 utilized German operational innovation and boldness to secure victory The Germans clearly met and understood the conditions that were necessary to achieve victory The central research question of this thesis is What lessons concerning setting the conditions for present day forcible entry operations can be gleaned from the successful German invasion of Norway in 1940 Forcible entry is the introduction of an aggregation of military personnel weapons systems vehicles and necessary support or a combination thereof embarked for the purpose of gaining access through land air or amphibious operations into an objective area against resistance This aggregation of military force attempts to set conditions that cripple the enemy's ability to react decisively to or interfere with the forcible entry operation The German emphasis on surprise and speed an effective psychological campaign and combined operations under a unified command in the invasion of Norway rendered the Norwegian and Allied intervention forces including the Royal Navy which dominated the seas in the area incapable of seriously interfering with the German forcible entry *Anatomy of a Campaign* John Kiszely, 2017 Senior military commander assesses the reasons behind the ignominious failure of the British campaign in Norway in 1940 **The German Decision to Invade Norway and Denmark** Earl F.

Ziemke,1960 *The Battle for Norway* Geirr H. Haarr,2010 This is the second volume of Geirr Haarr's monumental and unsurpassed account of the events at sea during the German invasion of Norway in 1940 The early part of the book covers the operations off southern and western Norway where Norwegian and British forces attempted to that the German advance out of the invasion ports and the stream of supplies and reinforcements across the Skagerrak The second part focuses on the British landings in central Norway where the Royal for the first time had its mastery challenged by air superiority from land based aircraft The author then covers the events in and around Narvik where Norwegian British French and Polish naval air and land forces were engaged in the first allied combined amphibious landings of World War II Finally the author focuses on the events during the allied evacuation in June in which the first carrier task force operations of the War including the loss of the carriers Glorious figure prominently As in the first volume the narratives shifts continuously between the strategic and operational issues and the experiences of the officers and ratings living through the events while extensive research has revealed aspects of the war that remain controversial to this day Book jacket *The German Invasion of Norway* Geirr H. Haarr,2011 This title documents the German invasion of Norway focusing on the events at sea More than most other campaigns of WWII Operation Weserubung has been shrouded in mystery legend and flawed knowledge This narrative gives a balanced account of the reasons behind the invasion *Denmark and Norway 1940* Doug Dildy,2009 **Command and Control of the First Modern "Joint" Campaign** Robert W. Strahan,2010-01-29 From the Introduction The Lost Symbol contains a big surprise Not only is the lost symbol found within the context of the novel but according to Dan Brown this lost symbol is out there for every one of us to find for ourselves This is a book which he wants to have real impact on our lives For some readers it may even be life changing and that's not what we expect of a thriller **Hitler Strikes North** Jack Greene,Alessandro Missignani,2013-03-19 A detailed account of Germany's groundbreaking Operation Weser bung the first three dimensional land sea air strategic invasion in history The German invasion of Denmark and Norway in April 1940 brought a sudden and shocking end to the Phoney War in the West In a single day multiple seaborne and airborne landings established German forces ashore in Norway overwhelming the unprepared Norwegian forces and catching the Allied Powers completely by surprise Their belated response was ill thought out and badly organized and by June 9 all resistance had formally ended The strategic importance of Scandinavian iron ore shipped through the port of Narvik to Germany was the main cause of the campaign The authors show how Allied attempts to interdict these supplies provoked German plans to secure them and also how political developments in the inter war years resulted in both Denmark and Norway being unable to deter threats to their neutrality despite having done so successfully in the First World War The German attack was their first joint air sea and land operation making large scale use of air landing and parachute forces and the Luftwaffe's control of the air throughout the campaign would prove decisive Although costly particularly for the Kriegsmarine it was a triumph of good planning improvisation and aggressive determined action by the troops on the ground Making full use of Norwegian

Danish and German sources this book is a full and fascinating account of this highly significant campaign and its aftermath both for the course of the Second World War and the post war history of the two countries conquered with such unprecedented speed The Campaign in Norway Thomas Kingston Derry (Historiker),1953 *The Campaign in Norway* H.m.s.o,1952 *Fire and Ice* Vincent Hunt,2014 The German occupation of Norway began on 9 April 1940 and ended on 8 May 1945 after the capitulation of German forces in Europe Hitler s scorched earth policy in northern Norway in 1944 flattened every building and forced fifty thousand people from their homes in an Arctic winter Some Norwegians escaped the excavation with whole communities sheltering in caves in sometimes desperate conditions This book presents stories never before told in English using new interviews from families caught in the scorched earth policy Contributors include Soroya Island refugees rescued from starvation
