A Scary Little Christmas Matthew C. DuPée, 2022-06-07 Controversial yet beloved among audiences Christmas themed horror movies emerged in the early 1970s and gained a notorious reputation with *Silent Night Deadly Night* 1984 depicting Santa as an ax wielding maniac Some parents and conservative groups condemned the film while others embraced the portrayal of Yuletide as a backdrop for fear and dread Drawing on interviews with directors producers special effects artists photographers and actors this book celebrates the sordid colorful history of the Christmas horror subgenre Psycho Santa films such as *Christmas Evil* 1980 and *3615 Code Pere Noel* 1989 are examined along with Yule Die slashers like *The Dorm that Dripped Blood* 1982 *Black Christmas* 1974 and *Silent Night Bloody Night* 1972 Commercial successes like *Gremlins* 1984 and *Rare Exports A Christmas Tale* 2010 are covered as well as more recent releases such as *Better Watch Out* 2016 *Red Christmas* 2016 and *Deathcember* 2019 Rare photographs promotional materials and an annotated filmography are provided

Cognitive-Behavioral Play Therapy Susan M. Knell, 1995-10-01 Cognitive Behavioral Play Therapy CBPT incorporates cognitive and behavioral interventions within a play therapy paradigm It provides a theoretical framework based on cognitive behavioral principles and integrates these in a developmentally sensitive way Thus play as well as verbal and nonverbal approaches are used in resolving problems CBPT differs from nondirective play therapy which avoids any direct discussion of the child's difficulties A specific problem solving approach is utilized which helps the child develop more adaptive thoughts and behaviors Cognitive behavioral therapies are based on the premise that cognitions determine how people feel and act and that faulty cognitions can contribute to psychological disturbance Cognitive behavioral therapies focus on identifying maladaptive thoughts understanding the assumptions behind the thoughts and learning to correct or counter the irrational ideas that interfere with healthy functioning Since their development approximately twenty five years ago such therapies have traditionally been used with adults and only more recently with adolescents and children It has commonly been thought that preschool age and school age children are too young to understand or correct distortions in their thinking However the recent development of CBPT reveals that cognitive strategies can be used effectively with young children if treatments are adapted in order to be developmentally sensitive and attuned to the child's needs For example while the methods of cognitive therapy can be communicated to adults directly these may need to be conveyed to children indirectly through play activities In particular puppets and stuffed animals can be very helpful in modeling the use of cognitive strategies such as countering irrational beliefs and making positive self statements CBPT is structured and goal oriented and intervention is directive in nature
