space In this book Prof Zezula and his co authors provide the first monograph on this topic describing its theoretical background as well as the practical search tools of this innovative technology Recent Trends in Electronics and Communication Amit Dhawan,Vijay Shanker Tripathi,Karm Veer Arya,Kshirasagar Naik,2021-12-13 This book comprises select proceedings of the International Conference on VLSI Communication and Signal processing VCAS 2020 The contents are broadly divided into three topics VLSI Communication and Signal Processing The book focuses on the latest innovations trends and challenges encountered in the different areas of electronics and communication especially in the area of microelectronics and VLSI design communication systems and networks and image and signal processing It also offers potential solutions and provides an insight into various emerging areas such as Internet of Things IoT System on a Chip SoC Sensor Networks underwater and underground communication networks etc This book will be useful for academicians and professionals alike Conference Proceedings IEEE Power Engineering Society.
