Depicting the Dead Stine Birk,2013-02-04 The present monograph takes its place in a now well established tradition of seeing sarcophagi as visual statements of deceased individuals that used allegories to plot lives and personal memories against mythological and other idealised narratives It focuses on Roman sarcophagi often referred to as stadtrömisch which reflects the fact that the field has traditionally been dominated by German scholars The aim of the book is twofold Firstly it is an exploration of how to read Roman sarcophagi which starts from those with portraits but which can contribute more broadly to the study of sarcophagi in general Secondly this book investigates gender values as represented through images and how to locate the individual in standardised iconography

Sickert Wendy Baron,Walter Sickert,2006-01-01 Walter Richard Sickert 1860 1942 was an artist of prodigious creativity For sixty years in his roles as painter teacher and polemicist he was a source of inspiration and influence to successive generations of British painters With his roots in the Victorian era Sickert broke all taboos He was uncompromisingly truthful revealing beauty in the squalid as in the sublime in cockney music halls the crumbling streets of Dieppe the grand sites of Venice and the low life of Camden Town Decades before Warhol he exploited the potential of photo based imagery and of studio production lines to create iconic portraits of the grandees of theatrical social and political life This catalogue is divided into two parts essay chapters describe Sickert s chronology in terms of stylistic and technical development and a fully illustrated catalogue presents more than 2800 drawings and paintings many of which have never been published before

Dictionary of the Renaissance Harry E. Wedeck,Frederick M. Schweitzer,2021-05-25 This A to Z reference offers a survey of Renaissance personalities innovations and other terminologies with an in depth introduction about the period By the fourteenth century Italian society bore little resemblance to that of the feudal age Merchants and financiers were establishing a new social order with greater freedom than their counterparts north of the Alps This meant that cultural transformations would first flourish in Italy and later be carried to the rest of the continent *Dictionary of the Renaissance* is a comprehensive reference guide to the period including informative entries about major artists and other important figures significant events and locations and other key terms and concepts associated with the Renaissance The introduction provides a historic overview of the cultural political economic and scientific transformations that occurred in Italy between the fourteenth and seventeenth centuries

Fuseli's Milton Gallery Luisa Cale,2006-12-21 Fuseli s Milton Gallery challenges the antipictorial theories and canons of Romantic period culture Between 1791 and 1799 Swiss painter Henry Fuseli turned Milton s Paradise Lost into a series of 40 pictures Fuseli s project and other literary galleries developed within an expanding market for illustrated books and a culture of anthologization used to

reading British and other classics in terms of the visualization of key moments in the text Thus transformed into repositories of virtual pictures literary texts became ideal sources of subjects for painters Illustrating British literature was a way of inventing a national grand style to fit the needs of a consumer society Cale calls into question the separation of reading and viewing as autonomous aesthetic practices To turn readers into spectators meant to place readers and reading within the dizzying world of associations offered by an emerging culture of exhibitions Attending to the energized reading effects developed by Fuseli's Gallery we rediscover a new side of the Romantic imagination which is not the solitary mentalist experience preferred by Wordsworth and Coleridge nor divorced from the senses let alone a refuge from the crowded public spaces of the Revolutionary period Rather Fuseli's embodied aesthetic exemplifies the associationist psychology espoused by the radical circle convening around the publisher Joseph Johnson including Joseph Priestley and Mary Wollstonecraft This book analyses exhibitions as important sites of Romantic sociability and one of many interrelated mediums for the literature debates and controversies of the Revolutionary period
