SCHOLARLY PUBLISHING

THE ELECTRONIC FRONTIER

Today, a stable medium for scholarly publishing is hard to come by. The traditional print medium is being replaced by electronic publishing. When the term "electronic publication" is used it generally means just that, a publication in a form suitable for use with a computer. It is more likely that these publications actually exist in the form of magnetic fields on some magnetisable medium, or in the form of physical, chemical or magnetic transformations of some medium that are detectable by means of light (a laser beam). It is the apparatus that permits humans to access and read the publications that is electronic.
