 Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard
 Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat
 surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most
 from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a
 constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its
 overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it
 distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a
 promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly
 drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for
 public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping
 Monmonier here examines the uses and limitations of one of cartography s most significant innovations With informed
 skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the
 Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy
 ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with
 a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich
 beautifully written and fully engaged with the issues of our time **Ultimate Interactive Atlas of the World** Elaine
