Schöne Laden Und Wirtshausbilder:

Restaurants and Dining Rooms Franziska Bollerey, Christoph Grafe, 2019-03-26 According to urban academic myth the first restaurants emerged in the wake of the French Revolution From the very beginning in the elegant salons of the latter days of the Ancien Régime the design of restaurants has been closely related to ideas of how food should be presented and how it may be consumed in public The appearance and atmosphere created by restaurant owners reflects culturally embedded ideals of comfort sociability and the good life As a product of the modern metropolis the restaurant encapsulates and illustrates the profound change in how its patrons viewed themselves as individuals how they used their cities and how they met friends or business partners over a meal The architectural design of environments for the consumption of food necessarily involves an exploration and a manipulation of the human experience of space It reflects ideas about public and private behaviour for which the restaurant offers a stage Famous architects were commissioned to provide designs for restaurants in order to lure in an ever more demanding urban clientele The interior designs of restaurants were often employed to present this particular aspect in consciously evoking an imagery of sophisticated modernity This book presents the restaurant its cultural and typological history as it evolved over time In this unique combination it provides valuable knowledge for designers and students of design and for everyone interested in the cultural history of the modern metropolis
