Finance Walter I. Garms, James W. Guthrie, Lawrence C. Pierce, 1978 **Political Economy of Public Education Finance** Nandan K Jha, 2020-06-22 Political Economy of Public Education Finance takes a unique approach in examining distribution of public education spending across urban school districts in the USA It provides a thorough and rigorous quantitative examination of the joint roles of school choice and political institutions in inequity in school district spending in the USA This book additionally provides conceptual and empirical treatment to a topic within the vast school choice scholarship that has been studied the least so far competition among school districts in the urban regional market The author further offers insight into the role of political institutions in ensuring equity in public school spending These institutions provide critical leadership in managing inter school district competition in the regional context Since equity in school finance is the outcome of interest in this book it includes necessary and sufficient attention to the topic too *Reshaping the Landscape of School Leadership Development* Philip Hallinger, 2003-01-01 Reshaping the Landscape of School Leadership Development A Global Perspective traces developments in this arena as they evolved since 1980 The book is comprised of chapters authored by the leading scholars in the fields of educational leadership and school leadership development from the United States Canada Europe Asia and Australia The vol **Economics of Education** Dominic J. Brewer, Patrick J. McEwan, 2010-01-26 A

collection of short stand alone chapters divided into five sections including overview of the field private and social returns to human capital investments production costs and financing of education teachers and teacher labor markets and education markets choice and incentives The collection provides international perspectives that describe the origins of these subjects their major issues and proponents their landmark studies and opportunities for future research The 70 contributors are each well regarded economists whose research has advanced the topic on which they write and this book fulfills an undersupplied niche for a text in the economics of education The chapters come from the acclaimed International Encyclopedia of Education 3e 2010 edited by Eva Baker Barry McGaw and Penelope Peterson The Encyclopedia contains over 1 350 articles in 24 sections that stretch from educational philosophies and technologies to measurement leadership and national systems of education This single volume textbook presents a cohesive view of this increasingly important area of economics Superb contributions from well regarded economists convey unique and useful perspectives Chapters contain an extensive bibliography and further readings to enable interested researchers to extend their knowledge into each specific topic

Public School Finance: Economics and Politics Jesse Burkhead, 1964 **The Great School Debate** Thomas L. Good, Jennifer S. Braden, 2014-04-08 This book examines reform in American education over the past fifty years and against this backdrop presents a compelling analysis of why contemporary voucher plans and charter schools have yet to fulfill the expectations of their advocates It is the only book to date to attempt a comprehensive synthesis and analysis of the emerging research base on vouchers and charter schools Suitable for courses in school policy school reform school leadership or educational issues it will also be of interest to anyone parents teachers policymakers directly involved with the charter school movement Key features of this timely new book include the following A Historical Perspective The early chapters look at American educational reform over the past fifty years and analyze why these efforts have fallen short of their goals Student Achievement Chapter 3 provides an insightful assessment of American students school achievement from 1970 to the present and in the process counters the widely held myth that overall student achievement has deteriorated Voucher Plans and Charter Schools Chapter 4 looks specifically at choice and vouchers in American education while chapters 5 7 provide a comprehensive and balanced examination of the charter school movement Policy Recommendations The book concludes with explicit policy suggestions that attempt to balance the educational needs of children and youth against the rights of schools to experiment Suggestions for developing broader coalitions to support public education particularly in the inner cities are also offered *The Ideology of Education* Kevin B. Smith, 2012-02-01 Advocates of market based education reforms including such policies as choice charters vouchers and outright privatization argue that they represent ready solutions to clearly defined problems Critics of market models on the other hand argue that these reforms misperceive the purposes of public education and threaten its democratic ethos This book explores both the promises and pitfalls of market forces their potential to improve the quality of public education and their compatibility with its republican justifications Smith argues that

although market models of education are not without utilitarian merit their potential to alter the social democratic purposes of education is seriously underestimated He supports this claim with a series of sophisticated analyses of the key assumptions underlying these models and by examining the normative elements of theory and methodology that can and often do skew empirical policy analysis toward market preferences He concludes that market reforms are not just a ready means to effectively address the problems of public schooling but rather represent a clear attempt to ideologically redefine its ends

Leading the Self-Managing School Brian Caldwell, 1992 This work is a sequel to *The Self Managing School* and deals with leadership responsibilities on two levels as head of a school responsible for local management and as a director in a Local Education Authority responsible in turn for the

[The Condition of Education in Rural Schools](#) Joyce D. Stern, 1994 This report focuses on the status of rural education and is intended to provide information to education researchers policymakers at the federal and state levels as well as others concerned about issues in rural education Specifically the goal is to increase federal policymakers attention to rural education problems promote improvements in rural schools and stimulate further research on rural education This report documents how rural conditions are sufficiently different from urban ones to warrant being examined independently and it endorses the hypothesis that a single set of public policies may not adequately address educational issues in rural versus urban settings National data mainly from surveys by the National Center for Education Statistics are synthesized covering the following topics 1 economic and demographic context of rural education 2 location and characteristics of rural schools and school districts 3 relationship between the rural school and its community 4 policies and programs benefiting rural education 5 profiles of educators in rural schools 6 effects of education reform in rural schools 7 public school finance policies and practices affecting rural schools 8 assessment of student performance in rural schools 9 education and work experiences of rural youth and 10 the future of rural education The report contains numerous data tables and a section describing statistical data sources and methodology LP
