**His Convenient Wife** Ruth Ann Nordin, 2015-01-03 Harriett Larson has been in love with Stan Craftsman for years but he's never paid any attention to her. Instead his focus has always been on her twin sister. So when Stan proposes to Harriett she knows it's only because he needs a mother for the little girl he recently adopted. And while her first reaction is to turn him down she can't bring herself to turn her back on an innocent child who needs her. So it is with reluctance she agrees to marry him. But only on one condition: Theirs will never be anything more than a marriage of convenience. She will not be vulnerable to him ever again. But as soon as Stan marries her he regrets the deal he made. She's not the wallflower he thought her to be. In fact she's much more appealing than her sister. The problem is how can he convince her of that so they can turn their marriage of convenience into something much more.

**Disorderly Sisters** Leila Silvana May, 2001 Historians and literary critics have long understood the crucial significance of the family to the nineteenth century middle class sensibility but almost all critical analyses to date have concentrated on the vertical pole of the familial axis: the parent-child relationship and very little on the horizontal pole: the sibling bond. This book looks beyond these analyses to show that at the core of nineteenth century domestic ideology is the figure of the sister.

**Working with Adult Survivors of Child Sexual Abuse** Elsa Jones, 2018-03-26 The author working from the Family Institute in Cardiff has been treating adult survivors of child sexual and physical abuse for several years and she has clearly and frankly described her work in this book. She begins by describing the context for working with her clients then describes the way she has welded systemic thinking and a feminist perspective into a theoretical model she uses to understand the problem and to guide her own work with the survivors. The descriptions of the therapeutic process are at the same time profound and simply conveyed. Her work is further clarified by the inclusion of twenty case examples. She shares her own dilemmas about working with adult survivors and in this way the book offers the reader support for the emotional impact of this work as well as a theoretical framework and suggestions about therapeutic technique.
