Second Self Computers And The Human Spirit:

The Second Self Sherry Turkle, 1984 In *The Second Self* Sherry Turkle looks at the computer not as a tool but as part of our social and psychological lives she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves of one another and of our relationship with the world Technology she writes catalyzes changes not only in what we do but in how we think First published in 1984 *The Second Self* is still essential reading as a primer in the psychology of computation This twentieth anniversary edition allows us to reconsider two decades of computer culture to re experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes Turkle frames this classic work with a new introduction a new epilogue and extensive notes added to the original text Turkle talks to children college students engineers AI scientists hackers and personal computer owners people confronting machines that seem to think and at the same time suggest a new way for us to think about human thought emotion memory and understanding Her interviews reveal that we experience computers as being on the border between inanimate and animate as both an extension of the self and part of the external world Their special place betwixt and between traditional categories is part of what makes them compelling and evocative In the introduction to this edition Turkle quotes a PDA user as saying When my Palm crashed it was like a death I thought I had lost my mind Why we think of the workings of a machine in psychological terms how this happens and what it means for all of us is the ever more timely subject of *The Second Self* Book jacket

The Culture of the Copy Hillel Schwartz, 1996-11-01 *The Culture of the Copy* is an unprecedented attempt to make sense of the Western fascination with replicas duplicates and twins In a work that is breathtaking in its synthetic and critical achievements Hillel Schwartz charts the repercussions of our entanglement with copies of all kinds whose presence alternately sustains and overwhelms us Through intriguing and at times humorous historical analysis and case studies in contemporary culture Schwartz investigates a stunning array of simulacra counterfeits decoys mannequins and portraits ditto marks genetic cloning war games and camouflage instant replays digital imaging

parrots and photocopies wax museums apes and art forgeries not to mention the very notion of the Real McCoy Working through a range of theories on biological mechanical and electronic reproduction Schwartz questions the modern esteem for authenticity and uniqueness The Culture of the Copy shows how the ethical dilemmas central to so many fields of endeavor have become inseparable from our pursuit of copies of the natural world of our own creations indeed of our very selves This updated edition takes notice of recent shifts in thought with regard to such issues as biological cloning conjoined twins copyright digital reproduction and multiple personality disorder At once abbreviated and refined it will be of interest to anyone concerned with problems of authenticity identity and originality *Constructing the Self in a Digital World* Cynthia Carter Ching, Brian J. Foley, 2012-09-10 It has become popular in recent years to talk about identity as an aspect of engagement with technology in virtual environments in games in social media and in our increasingly digital world But what do we mean by identity and how do our theories and assumptions about identity affect the kinds of questions we ask about its relationship to technology and learning Constructing the Self in a Digital World takes up this question explicitly bringing together authors working from different models of identity but all examining the role of technology in the learning and lives of children and youth Psychology and the Other David Goodman, Mark Freeman, 2015 The figure of the Other is an important though underutilized vehicle for exploring and reconceptualizing classic psychological and philosophical issues from identity and purpose to human frailty and suffering Moreover it can be used to reorient inquiry toward aspects of the human condition that are often regarded as secondary or peripheral for instance our responsibility to others and to the environment A broad spectrum of disciplines including psychology philosophy theology and religious studies speak about the challenges we face in encountering the Other vis vis our receptivity openness and capacity to entertain the stranger in our midst Through constructive critical exchange Psychology and the Other engages such perspectives on the Other from various subdisciplines within psychology and related disciplines The volume uses the language of the Other as a vehicle for rethinking aspects of psychological processes especially within the therapeutic context As a group the contributors demonstrate that the language of the Other may be more fitting than the egocentric language frequently employed in psychology They also embrace the challenge to create new theories and practices that are more ethically attuned to the dynamic realities of psychological functioning The book is organized into three sections The first deals with foundational philosophical concerns and provides an introduction to the project of thinking Otherwise The second section brings these fundamental philosophical concerns to bear on the therapeutic situation especially in the realm of relational psychoanalysis The final section of the book addresses concrete psychological situations in which the Other figures prominently and where the power of thinking Otherwise is most visibly demonstrated **Learning One's Native Tongue** Tracy B. Strong, 2019-11-26 Citizenship is much more than the right to vote It is a collection of political capacities constantly up for debate From Socrates to contemporary American politics the question of what it means to be an authentic citizen is an

inherently political one With Learning One s Native Tongue Tracy B Strong explores the development of the concept of American citizenship and what it means to belong to this country starting with the Puritans in the seventeenth century and continuing to the present day He examines the conflicts over the meaning of citizenship in the writings and speeches of prominent thinkers and leaders ranging from John Winthrop and Roger Williams to Thomas Jefferson Nathaniel Hawthorne Abraham Lincoln Frederick Douglass and Franklin Roosevelt among many others who have participated in these important cultural and political debates The criteria that define what being a citizen entails change over time and in response to historical developments and they are thus also often the source of controversy and conflict as with voting rights for women and African Americans Strong looks closely at these conflicts and the ensuing changes in the conception of citizenship paying attention to what difference each change makes and what each particular conception entails socially and politically
