Ulysses and the Poetics of Cognition Patrick Colm Hogan,2013-09-05 Given Ulysses perhaps unparalleled attention to the operations of the human mind it is unsurprising that critics have explored the work s psychology Nonetheless there has been very little research that draws on recent cognitive science to examine thought and emotion in this novel Hogan sets out to expand our understanding of Ulysses as well as our theoretical comprehension of narrative and

even our views of human cognition He revises the main narratological accounts of the novel clarifying the complex nature of narration and style He extends his cognitive study to encompass the anti colonial and gender concerns that are so obviously important to Joyce s work Finally through a combination of broad overviews and detailed textual analyses Hogan seeks to make this notoriously difficult book more accessible to non specialists

Power and Issue Framing in the Contemporary World M. N. I. Sorkar,2022-03-16 This book puts forward a new angle of understanding the society of states in the milieu of the contemporary world The absence of a regulatory mechanism i e anarchy has been the fundamental issue of international relations This book explains how the normative imperatives information and communication technology ICT and nuclear deterrence generated ambiance have poised the states in a society where they are bound to follow certain normative imperatives that dilute the color and meaning of anarchy and obliges the states to act in a certain way It develops a theoretical proposition with regard to state power defined in terms of the capability of determining the outcomes The proposition first elaborates how international institutions foster normative imperatives then in line with this ontology it narrows down the focus solely on the power of the states in the contemporary world It explains how the power that can determine the outcome today is holistic in nature comprising both materialistic and normative factors In the next step it tailors the proposition in a way so as to employ it for a specific empirical work The book does not end just positing the theoretical proposition the proposition is testified through some case studies with regard to climate negotiations under the UNFCCC The empirical part not only serves to examine the plausibility of the theoretical proposition but it also presents the logic of the major actors and the politics with respect to some of the major issues of climate change i e mitigation funding policy and mechanism and adaptation The scholars in this arena climate activists and climate conscious people in general would find this book worth reading as it kindles a different angle to understand the issues in the context of the contemporary world and as it elaborates the logic framing process and mechanism of reaching outcomes through complex negotiation process No other work has so far analyzed the issues covering the entire period of 21 apex UNFCCC negotiations that led to the Paris Agreement Apart from university libraries this book thus has the prospect to be sold in the markets targeting the academicians climate change experts bureaucrats negotiators and the common readers

A History of Early Vedānta Philosophy Hajime Nakamura, 1983-01-01 The history of the Vedanta school is well known since the time of sankara but its prehistory before sankara is quite obscure However there is a period of a thousand years between the compilation of the major Upanisads of sankara without loss of the tradition of the upanisads there appeared many philosophers and dogmaticians although their thoughts are not clearly known In a history of early vedanta Philosophy the author made clear the details of the pre sankara vedanta philosophy utilizing not only sanskrit materials but also Pali prakrit as well as Tibetan and Chinese sources In this respect this epoch making work was awarded the imperial prize by the Japan Academy *Social Psychology of Intergroup Reconciliation* Arie Nadler, Thomas Malloy, Jeffrey D. Fisher, 2008-03-10 The volume begins with an overview by Herbert Kelman discussing reconciliation as distinct from related processes of conflict settlement and conflict resolution Following that the first section of the volume focuses on intergroup reconciliation as consisting of moving beyond feelings of guilt and victimization i.e. socio emotional reconciliation These processes include acceptance of responsibility for past wrongdoings and being forgiven in return Such processes must occur on the background of restoring and maintaining feelings of esteem and respect for each of the parties The chapters in the second section focus on processes through which parties learn to co exist in a conflict free environment and trust each other i.e. instrumental reconciliation Such learning results from prolonged contact between adversarial groups under optimal conditions Chapters in this section highlight the critical role of identity related processes e.g. common identity and power equality in this context The contributions in the third part apply the social psychological insights discussed previously to an analysis of real world programs to bring reconciliation e.g. Tutsis and Hutus in Rwanda Israelis and Palestinians and African societies plagued by the HIV epidemic and the Western aid donors In a concluding chapter Morton Deutsch shares his insights on intergroup reconciliation that have accumulated in close to six decades of work on conflict and its resolution
