Second Conquest Of Latin America:

The Second Conquest of Latin America Steven C. Topik, Allen Wells, 2010-02-01 Between 1850 and 1930 Latin America's integration into the world economy through the export of raw materials transformed the region. This encounter was nearly as dramatic as the conquistadors' epic confrontation with Native American civilizations centuries before. An emphasis on foreign markets and capital replaced protectionism and self-sufficiency as the hemisphere's guiding principles. In many ways the means employed during this period to tie Latin America more closely to western Europe and North America resemble strategies currently in vogue. Much can be learned from analyzing the first time that Latin Americans embraced export-led growth. This book focuses on the impact of three key export commodities: coffee, henequen, and petroleum. The authors concentrate on these rather than on national economies because they illustrate more concretely the interaction between the environment, natural and human resources, and the world economy. By analyzing how different products spun complex webs of relationships with their respective markets, the essays in this book illuminate the tensions and contradictions found in the often conflictive relationship between the local and the global, between agency and the not-so-invisible hand. Ultimately, the contributors argue that the results of the second conquest were not one-sided as Latin Americans and foreigners together forged a new economic order, one riddled with contradictions that Latin America is still attempting to resolve today. **The**

Mining Tycoons in the Age of Empire, 1870-1945 Raymond E. Dumett, 2016-12-05 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an unprecedented level of technological change material excess untrammled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who with the thousands of prospectors diggers shift bosses timbermen blastmen and muckers in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals their business interests the technologies they employed and the national and international political considerations under which they operated Furthermore this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked particularly the often long lasting impact on indigenous populations the environment transport links and economic development By approaching the subject matter through this stimulating mix of cultural social economic business and colonial history many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history

The Business of War James McCarty, Matthew Tapie, Justin Bronson Barringer, 2020-10-01 The Business of War incisively interrogates the development and contemporary implications of the military industrial complex It exposes the moral dangers of life in neoliberal economies dependent upon war making for their growth and brings the Christian tradition's abundance of resources into conversation with this phenomenon In doing so the authors invite us to rethink the moral possibilities of Christian life in the present day with an eye toward faithful resistance to the business of war and its influence in every aspect of our lives In combining biblical historical theological and ethical analyses of the business of war the authors invite us to better understand it as a new moral problem that demands a new faithful response With contributions from Pamela Brubaker Stan Goff Christina McRorie Logan Mehl Laituri Kara Slade Won Chul Shin David Swartz Jonathan Tran Myles Werntz Matthew Whelan Tobia Winright
