

The Second Creation Story

- 
- A detailed view of the central portion of Michelangelo's famous fresco, 'The Creation of Adam'. It focuses on the two hands reaching toward each other: the hand of God on the right, extended from a reclining position, and the hand of Adam on the left, reaching out from a similar reclining position. The fingertips are just inches apart, creating a sense of tension and divine spark. The background is the cracked and aged texture of the original plaster.
- Genesis 2: 4-25.
 - Genesis 2 – 3 are believed to be derived from the “J – Source” or the “Yahwistic writer.”
 - It begins with the words, “This is the account of the heavens and the earth when they were created, when the Lord God made the earth and the heavens.” (v. 4)

Dembski, 2016-04-15 For a thing to be real it must be able to communicate with other things If this is so then the problem of being receives a straightforward resolution to be is to be in communion So the fundamental science indeed the science that needs to underwrite all other sciences is a theory of communication Within such a theory of communication the proper object of study becomes not isolated particles but the information that passes between entities In Being as Communion philosopher and mathematician William Dembski provides a non technical overview of his work on information

Dembski attempts to make good on the promise of John Wheeler Paul Davies and others that information is poised to replace matter as the primary stuff of reality With profound implications for theology and metaphysics Being as Communion develops a relational ontology that is at once congenial to science and open to teleology in nature All those interested in the intersections of theology philosophy and science should read this book *Closure in Biblical Narrative* Susan Zeelander,2011-12-23 Multiple and sometimes unexpected forms of closure in biblical narratives bring their stories to satisfactory close Knowledge of these conventions and how they affect their stories is valuable to students of Bible and of narrative

Exceeding Reason Dennis Vanden Auweele,2020-10-12 The work of the later Schelling in and after 1809 seems antithetical to that of Nietzsche one a Romantic idealist and Christian the other Dionysian anti idealist and anti Christian Still there is a very meaningful and educative dialogue to be found between Schelling and Nietzsche on the topics of reason freedom and religion Both of them start their philosophy with a similar critique of the Western tradition which to them is overly dualist rationalist and anti organic metaphysically ethically religiously politically In response they hope to inculcate a more lively view of reality in which a new understanding of freedom takes center stage This freedom can be revealed and strengthened through a proper approach to religion one that neither disconnects from nor subordinates religion to reason Religion is the dialogical other to reason one that refreshes and animates our attempts to navigate the world autonomously In doing so Schelling and Nietzsche open up new avenues of thinking about the relationship between freedom reason and religion

Galileo, Darwin, and Hawking Phil Dowe, 2005-03-15 The history of the interaction between science and religion is fraught with tension although as philosopher Phil Dowe demonstrates many thoughtful and religious people have also found harmony between these two crucial fields This fascinating book insightfully surveys the relationship of science reason and religion giving special attention to the most contentious topics cosmology evolution and miracles Providing a superb introduction to the philosophy of science Dowe's *Galileo Darwin and Hawking* contends that there are four basic ways to relate science and religion Two of them naturalism and religious science present these endeavors as antagonistic By contrast an independence view understands them as wholly unrelated Finally an interaction account sees religion and science as complementary perhaps even dependent on one another Dowe finds this last perspective the most historically and philosophically compelling He argues his case by exploring the history of science highlighting the life and work of three scientific giants Galileo Galilei Charles Darwin and Stephen Hawking

The Constitution in Jeopardy Russ Feingold, Peter Prindiville, 2022-08-30 A former U S senator joins a legal scholar to examine a hushed effort to radically change our Constitution offering a warning and a

way forward Over the last two decades a fringe plan to call a convention under the Constitution's amendment mechanism the nation's first ever has inched through statehouses Delegates like those in Philadelphia two centuries ago would exercise nearly unlimited authority to draft changes to our fundamental law potentially altering anything from voting and free speech rights to regulatory and foreign policy powers Such a watershed moment would present great danger and for some great power In this important book Feingold and Prindiville distill extensive legal and historical research and examine the grave risks inherent in this effort But they also consider the role of constitutional amendment in modern life Though many focus solely on judicial and electoral avenues for change such an approach is at odds with a cornerstone ideal of the Founding that the People make constitutional law directly In an era defined by faction and rejection of long held norms *The Constitution in Jeopardy* examines the nature of constitutional change and asks urgent questions about what American democracy is and should be

In the Whirlwind Robert A. Burt, 2012-05-16 In recounting the rich narratives of key biblical figures from Adam and Eve to Noah Cain Abraham Moses Job and Jesus *In the Whirlwind* paints a surprising picture of the ambivalent mutually dependent relationship between God and his peoples Taking the Hebrew and Christian Bibles as a unified whole Burt traces God's relationship with humanity as it evolves from complete harmony at the outset to continual struggle In almost every case God insists on unconditional obedience while humanity withholds submission and holds God accountable for his promises

Be a Blessing Elizabeth Ellen Ostring, 2016-03-08 Utilizing the techniques of narratology and literary analysis this study examines the foundational biblical text of Genesis to develop the theology of ordinary human work that emerges from it The study offers a history of Christian theologies of human work as well as a unique approach to both the topic of work and the literary structure of Genesis The emerging concept of blessing rather than achievement provides a refreshing and yet practical approach to human work This is a valuable complement to the current interest in this topic and one that although challenging some current concepts is encouraging

The Quest for Fitness Mark Michaels, 2000-12 *The Quest for Fitness* A rational exploration into the new science of organizations follows the tradition of Frederick Taylor and W Edwards Deming by rationally applying scientific principles and processes to understanding the nature of organization The book recognizes that the environment has changed drastically since Taylor applied Newtonian principles to describe the industrial organization The synthesis forces the reader to change his/her view from considering

how an organization can be created to take control of its environment to how one can be created to survive over time in a changing environment The Quest for Fitness leaves the reader with a vision of organizations as complex adaptive organisms striving to stay fit on an ever changing landscape There is an ongoing search to optimize one's position in an uncharted wilderness Survival is not dependent upon the strongest but upon the ability to adapt as the landscape changes The leaders of such organizations are no longer commanders but explorers who create network infrastructures enabling information to be received integrated and shared throughout the organization so that individual parts can best respond to immediate conditions without the total system flying apart

Genesis 1 and the Creationism Debate Steven DiMattei, 2016-04-08 Modern readers often assume that Genesis 1 depicts the creation of the earth and sky as we know it Yet in an appeal for textual honesty Steven DiMattei shows that such beliefs are more representative of modern views about this ancient text than the actual claims and beliefs of its author Through a culturally contextualized and objective reading of the texts of Genesis 1 and 2 this study not only introduces readers to the textual data that convincingly demonstrate that Genesis two creation accounts were penned by different authors who held contradictory views and beliefs about the origin of the world and of man and woman but also establishes on textual grounds that what the author of Genesis 1 portrayed God creating was the world as its author and culture perceived and experienced it not the objective world but a subjective world subject to the culturally conditioned views and beliefs of its author In the end this book clearly illustrates that the Bible's ancient texts do in fact represent the beliefs and worldviews of ancient peoples and cultures not those of God not those of later readers and especially not those of modern day Creationists

Evil and Evolution: A Theodicy Richard W. Kropf, 2004-08-18 First published in 1984 and recently revised and updated this book deals with the problem of evil or theodicy God s justice It contends that the process of evolution particularly as it bears on the emergence of free will rather than being a barrier to faith gives us the key to understanding its greatest obstacle the existence of so much suffering in the world It further advances the still contested claim that God is truly our fellow sufferer in our struggle to overcome evil in all of its many forms
