## **Second Opinion An Introduction To Health Sociology:**

**Second Opinion** John Germov, 2009-07-02 Second Opinion is the leading health sociology textbook for undergraduate students. Accompanied by a comprehensive online resource centre, this strong teaching text introduces students to the theories, concepts, and contexts that are needed to understand the issues confronting health sociology. Second Opinion Jennie Mary Hornosty, John Germov, 2016-07-18 Taking an intersectional approach to the study of health and illness, Second Opinion introduces students to the field through an accessible yet authoritative overview of key theories, debates, and research findings. Written in a clear, straightforward style with contributions from both Canadian and international scholars, this comprehensive volume examines a wide range of topics including racialization, disability, aging, the environment, Aboriginal health, and the political economy of the health industry. Themes such as the social determinants of health, health inequalities, intersectionality, and the roles of both structure and agency in creating and maintaining the status quo are integrated throughout. The array of pedagogical features fosters engagement with the material while providing study support and suggestions for further learning. New content and examples on maternal mortality rates, the latest in sociological theory, health care inequalities in Canada, obesity, appearance norms, healthy aging, physician-assisted death, drug costs in Canada, and the world, and integrated health care encourage students to think critically about health care practices and policies in Canada within a global health perspective. Thoroughly revised and up to date with a new visual program to appeal to visual learners and a new chart on the inside cover that details the coverage of social determinants throughout the text, the second Canadian edition of Second Opinion ensures that students of health sociology have everything they need to understand this complex discipline right at their fingertips. Second Opinion Jennie Mary Hornosty, Professor of Sociology and Pro Vice-Chancellor of the Faculty of Education and Arts, John Germov, 2011-09-30 This thoroughly adapted Canadian edition introduces students to the sociology of health and illness through an accessible yet authoritative overview of the field's key debates, theories, and research findings. Written in a clear, straightforward style with contributions from both Canadian and international scholars, this comprehensive volume examines a wide range of topics including citizenship, disability, aging, indigenous health, and political economy. Themes such as the social determinants of health, health inequalities, and the roles of both structure and agency in creating and maintaining societal arrangements are integrated throughout, along with a wealth of Canadian examples, research, and statistics. Focusing on wellness as opposed to illness and complete with an array of pedagogical features to encourage students to think critically about the material, Second Opinion offers an engaging alternative view of the study of health. The Blackwell Companion to Medical Sociology William C. Cockerham, 2008-05-12 The Blackwell Companion to Medical Sociology is a comprehensive collection of twenty-six original essays by leading medical sociologists from all over the world. The articles are organized both topically and by region to provide thorough coverage of the concerns, issues, and future directions of the discipline. This invaluable resource is the most informed, complete, and up to

on VitalSource      **Complementary and Alternative Medicine in Nursing and Midwifery** Jon Adams, Philip Tovey, 2014-06-11 This book explores the historical social political and cultural facets of integration between complementary and alternative medicine and nursing midwifery It examines the ever expanding integration in relation to the role and conceptualization of the patient the role and responsibilities of different professional healthcare providers nurses midwives alternative therapists etc the future provision and approach of nursing and midwifery practice the challenges and opportunities currently facing healthcare systems as a result of integration This innovative book provides the first critical overview of this important field of health research It is important reading for medical sociologists nurses and other health professionals as well as students in these areas with an interest in complementary and alternative medicine      **The Palgrave Handbook of Gender and Healthcare** E. Kuhlmann, E. Annandale, 2012-06-26 An authoritative state of the art collection that brings together key experts to provide an overview of the field This new paperback edition includes 3 new chapters on human resources and health end of life care and complementary and alternative medicine as well as thorough updates to the introduction and conclusion      **Tabbner's Nursing Care - E-Book** Gabby Koutoukidis, Jodie Hughson, 2012-10-01 A vital member of the health care team the contemporary enrolled nurse faces increasing challenges and an increasing level of responsibility Written specifically for Australian and New Zealand enrolled nurse students this long awaited new edition reflects the changes and challenges in contemporary enrolled nurse practice as well as the additions and modifications that are occurring in nursing curricula Tabbner's Nursing Care Theory and Practice 5th edition has been written reviewed and edited by the people who educate the enrolled nurse and continues to provide enrolled nurse students with the most comprehensive resource available      *Authentic Professional Learning* Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or paraprofessional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and nancial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal

complex and diverse process that does not lend itself to easy prescription or the realisation of others intents

*Complementary Medicine in Australia and New Zealand* Hans Baer, 2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States

Women, Motherhood and Living with HIV/AIDS Pranee Liamputtong, 2013-03-12 There are about 34 million people worldwide living with HIV AIDS Half are women There has been a dramatic global increase in the rates of women living with HIV AIDS Among young women especially in developing countries infection rates are rapidly increasing Many of these women are also mothers with young infants When a woman is labeled as having HIV she is treated with suspicion and her morality is being questioned Previous research has suggested that women living with HIV AIDS can be affected by delay in diagnosis inferior access to health care services internalized stigma and a poor utilization of health services This makes it extremely difficult for women to take care of their own health needs Women are also reluctant to disclose their HIV positive status as they fear this may result in physical feelings of shame social ostracism violence or expulsion from home Women living with HIV AIDS who are also mothers carry a particularly heavy burden of being HIV infected This unique book attempts to put together results from empirical research and focuses on issues relevant to women motherhood and living with HIV AIDS which have occurred to individual women in different parts of the globe The book comprises chapters written by researchers who carry out their projects in different parts of the world and each chapter contains empirical information based on real life situations This can be used as evidence for health care providers to implement socially and culturally

appropriate services to assist individuals and groups who are living with HIV AIDS in many societies The book is of interest to scholars and students in the domains of anthropology sociology social work nursing public health medicine and health professionals who have a specific interest in issues concerning women who are mothers and living with HIV AIDS from cross cultural perspective      *Psychology: An Introduction for Health Professionals* Debra O'Kane,2023-09-01 Understanding the basics of psychology what drives human choices and behaviours underpins good practice in health Psychology An Introduction for Health Professionals presents the latest relevant theories and concepts as well as their application to specific health issues and clinical practice Written by Deb O Kane and other leading experts in the field this book will help you understand more about why people act in certain ways related to their health and wellbeing from diagnoses health interventions and outcomes For example why does a person not complete a full course of antibiotics or how can you expect a someone to respond to stress loss or pain Scenarios and reflection questions help to bring important psychology concepts to life The book is written specifically for health science and nursing students undertaking discreet units of study in psychology but will also be applicable to practitioners in their daily work Includes relevant theories and concepts in psychology incorporating latest evidence Focus on application to practice suitable for both students and health practitioners Covers the lifespan from birth to ageing Suite of 55 scenarios with reflection questions additional 55 available on Evolve bringing theory to life Suitable for students in multiple different health disciplines Instructor resources on Evolve PowerPoints Testbank Image Collection Answer Key Student Practice Questions Additional Discipline specific Case Studies Updated to reflect priority issues impacting individuals and health practice such as COVID 19 Content divided into three sections for easy navigation from theories and underpinning knowledge through to application to health issues and discipline specific cases Addition of crisis health including major disasters and the pandemic      **Living with Illness** Cath Rogers-Clark,Kristine Martin-McDonald,Alexandra McCarthy,2005 Focuses on developing and strengthening understanding of the illness experience and encourages students to critically appraise conventional approaches to understanding and caring for those who are ill to empower readers to offer true holistic care and where appropriate to change nursing practices in light of recent research
