accepted for presentation and discussion at the 2nd International Conference on Smart Learning Ecosystems and Regional Developments SLERD 2017 held 22-23 June. What characterizes smart learning ecosystems? What is their role in city and regional development and innovation? How can we promote the engagement of citizens in smart learning ecosystems? These are some of the questions addressed at SLERD 2017 and documented here. The proceedings include scientific papers that endeavor to understand, devise, and promote innovative human-centric design and development methods, education training practices, informal social learning, and citizen-driven policies. The individual papers elaborate on the notion of smart learning ecosystems, study the relation of smart learning ecosystems with ICT and economic development, and deployment strategies alongside new policies for smarter proactive citizens, making them a valuable resource for researchers and policymakers alike.

Nothin' Much William A. Luckey, 2004-02-01. Failure or success in a life is often calculated on what a man owns. A man with nothing, no steady job, not even a driver's license, is judged a failure to the rest of the world. When Dayton Sandoval lands unexpectedly in a small New Mexico town, he knows he will earn a few dollars, learn a few names, and be gone before entanglements hobble and hold him. It's a familiar pattern: what he does, how he survives. But it doesn't work out that way, not at all. Because of an old woman, a rank horse, and the child who loves him, and a distant and

fearful lady As Dayton Sandoval allows these three women to need him as he learns to love and care for them he will pull apart the devastation of his past and find a completed and whole man where he thought lay only ancient unhealing wounds
